PRECAUTIONARY

1: Please read this instruction manual carefully before using the L01Pro. It contains important information about your safety as well as operating and maintenance instructions.

2: Please observe all safety precautions to prevent damage caused by improper use of the L01Pro.

3: We are not responsible for any damage caused by improper use or incorrect operation.

4: Before pasting the light strip, please wipe the position of the edge around the back shell of the TV set, to prevent dust caused by the phenomenon that the light strip is not firmly pasted off.

5: The starting position for attaching the light strip starts at the top center of the TV's rear case.

6: When you use it for the first time, please set the installation direction of the light strip and the number of light beads on the APP side.

7: If you are worried that the machine will be loose, you can use a spare 3M adhesive to strengthen the fixed machine.

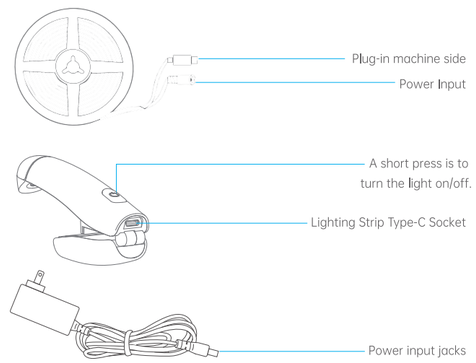
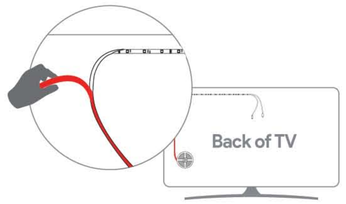
PRODUCT DESCRIPTION

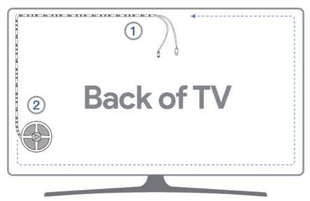


PRODUCT INSTALLATION

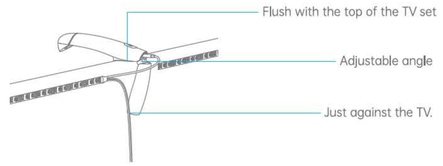
1: Wipe the dust and dirt from the back case of the TV set with a rag first, and then clean it again afterwards with the alcohol wipe that comes with the package.

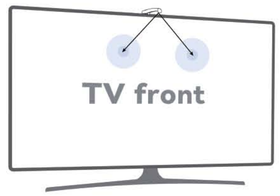
2: Slowly tear off the red centrifugal paper with 3M adhesive on the light tape and press it firmly starting from the top center of the back case of the TV machine. Reinforce the corners with clips.



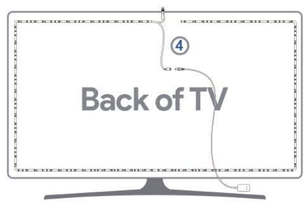


3: The machine is placed at an adjusted angle in the center of the top of the TV, and is required to be flush with the top of the TV.





4: Connect the light strip, the power adapter and the plug-in cord of the device, and plug the power adapter into the AC outlet, at this time, the light strip will all light up.



Note: Short press the power button to turn on and off the light strip, please turn on the light strip to light it when connecting the APP.

APP OPERATION

1: Download and install APP

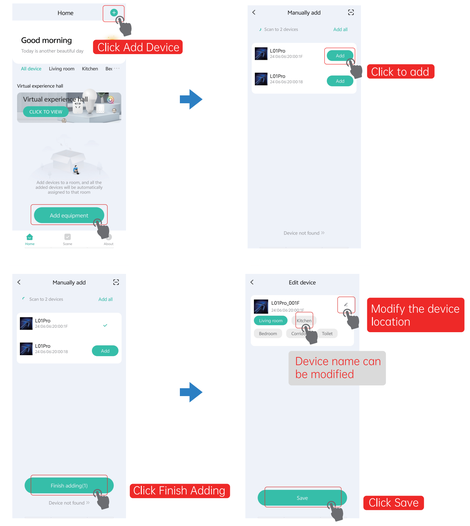
1.1: Scan the QR code to download.

1.2: Download and install the app from the App Store or Google Play by searching for "uLamp".

Note: To grant permission to the "uLamp" application to use the Bluetooth function.

2: APP operation

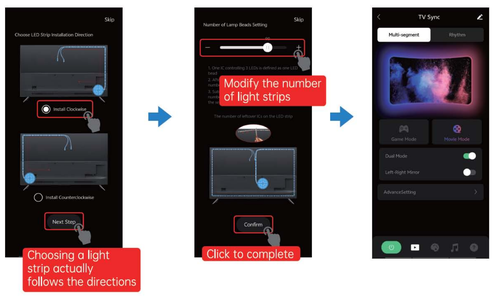
2.1: Open the APP to add devices.



Note: When adding a device, the Bluetooth of the cell phone must be on and the machine light strip is on.

2.2: Light strip setup.

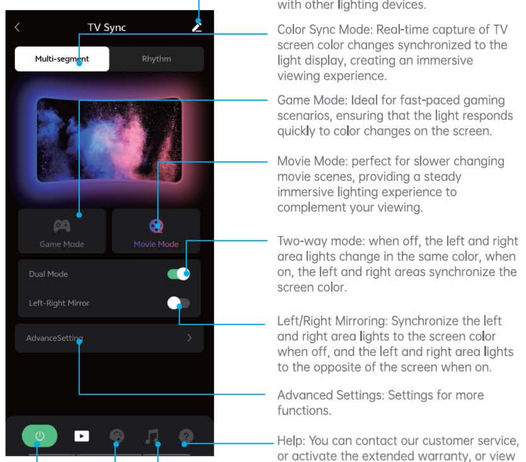
After the device is successfully added, the first time you use it, it will be set up for the light strip, please complete the corresponding settings according to the actual installation and then it can be used normally.

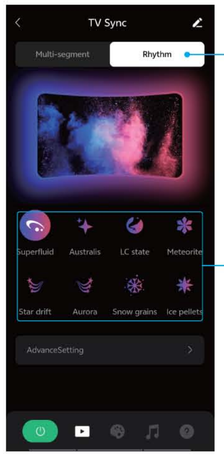


Note: The light strip setup interface will only appear when you add the device for the first time and save the data after the setup is completed. After that, when you open the APP and click the device icon, you will enter it directly without setting again.
After setting the parameters and exiting the APP on the mobile side, the working status of the device will not be affected.

3: APP interface function description

3.1: TV Sync Interface Description





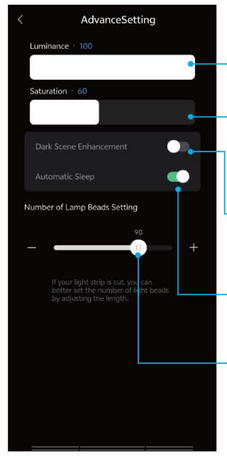
Color synchronization and sound fusion mode.

Blend screen color with playback sound for a truly dynamic and synchronized visual experience.

8 sound lighting effects.

Note: The sound light effect will only work in the light strip areas on the left and right sides of the TV.

3.2: Advanced Settings Interface Description



Adjust the brightness of the strip, the default is the brightest 100. the larger the value the brighter the light, the smaller the value the dimmer the light.

Adjusts the color vividness of the strip, the default is the brightest 60. the larger the value the more intense the color, the smaller the value the lighter the color.

When turned on, it increases the brightness of the strip when the TV screen is dark. The default is off.

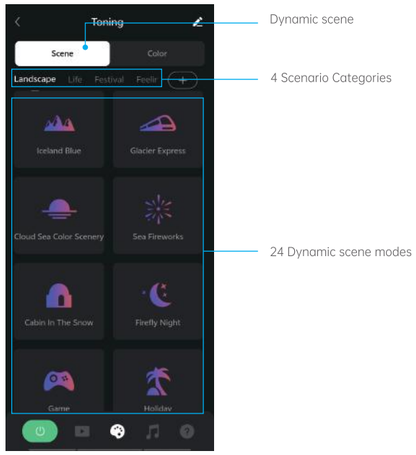
When turned on, it automatically closes the strip when the TV screen is closed. The default is on.

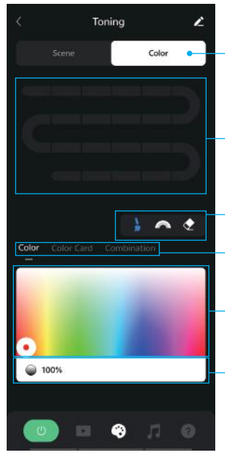
Use the +/- buttons to adjust the number of lamp beads that are effectively illuminated by the strip.

Note: When you add the device for the first time, you do not need to adjust it again, but if the TV set has an updated size, you need to adjust it again.

3.3: Toning Interface Description

Dynamic and static light modes, choose from 24 different dynamic light effects or static color palettes, pick to fit your mood and environment.





3.4:Musical Rhythm Interface Description

FCC Caution:
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:
Note:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or
more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help. FCC Radiation Exposure Statement:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.
