QA

Q: What is the warranty policy for this stylus?

A: We offer a one-year warranty on this stylus. You can contact us to get warranty service if you encounter any problems.

(You can also reach out to us through Amazon and we will register you and extend the warranty for free)

Q: How to use the stylus?

A: Step 1, Attach the pencil to the iPad.

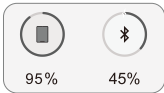

Step 2, Turn on the Bluetooth of the iPad and pair it with the Bluetooth named SHEZI pencil.

Step 3, After connecting, take the pencil off the iPad, wait 3 seconds, then you can use the pencil to write on your iPad.

Attention: If you have used another stylus, please disconnect the Bluetooth connection of another stylus before connecting SHEZI pencil.

Q: How to check the remaining charge for the pencil?

A: Adding the battery component to the iPad desktop will enable a real-time power display.

Q: Does the Pencil support pressure sensitivity and double-click shortcuts?

A: Because the above technology is Apple's patent, all non-Apple stylus in the market now do not support this function.

But the tilt sensor and shortcut function we developed can meet most of your needs, please feel free to use it.

Q: How to use double tap to wake up the memo, smart doodle, and quick screenshot function?

A: These features need to be set up on your iPad and are the same as the iPad pencil operation.

In the bright screen state, double-tap to wake up the memo quickly.

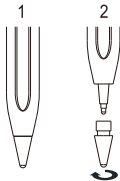

On special pages such as memos, after drawing a pattern, the pencil tip can be left for 2 seconds to generate a perfect graphic.

Swipe the stylus from the bottom left corner of the screen to the top right corner to take a quick screenshot.

Q: How do I change the nib?

A: Our nibs are the same size as the original iPad nibs and can be replaced by simply rotating and unscrewing them.

We recommend using SHEZI fine tip (purchased at Amazon) for a better experience.

Product name
SHEZI wireless charging stylus

Product size
165*89mm

Charging time
40 minutes

Use time
12 hours

Charging method
Wireless charging

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
