Designed for Archers by Archers

# STEADY AIM A1

The Steady Aim A1 is a high-tech system designed for archers by archers. As such we understand and appreciate what archers and coaches are looking for in a training system. The Steady Aim A1 provides quantitative feedback which can be analysed and interpreted by the user resulting in informed decision making to one's setup and technique.

The Steady Aim Archery App streams motion data from the device via a Bluetooth Low Energy connection to provide you with real-time feedback, as well as the full history of your shooting sessions.

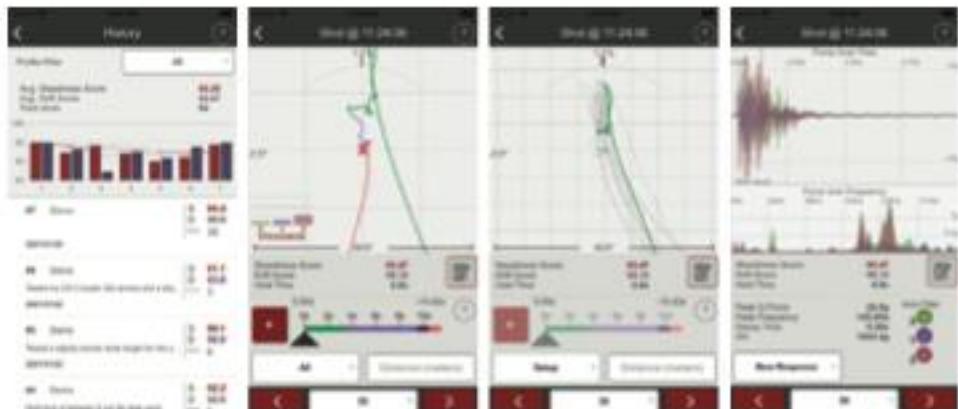

Follow your friends and students via the Steady Aim App and compare results.

## IN THE BOX:

- Steady Aim A1 Archery Device.
- Attachment Band and Spare.
- Steady Aim Protective Case with Carabiner.
- Micro USB Charging Cable.
- Quick Start Guide.
- Steady Aim Sticker.

## Regulatory Statements

The Steady Aim A1 is certified for use in the United States. For full regulatory details and statements please visit [www.steady-aim.com/regulatory](http://www.steady-aim.com/regulatory)

## FCC - United States

Steady Aim A Series Model: SA-01

FCCID: 2A7L7-SA01

This device complies with FCC part 15 FCC Rules. Operation is subject to the following two conditions: 1. This device may not cause harmful interference and 2. This device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**RF Warning Statement:**

**The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.**
