

Solder Board-Component View 18	 A photograph of a small green printed circuit board (PCB) component. The board is rectangular and populated with various electronic components, including a central integrated circuit (IC), several resistors, capacitors, and surface-mount components. It features four circular mounting holes at the corners. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 19	 A photograph of a larger green printed circuit board (PCB) component. The board is rectangular and populated with various electronic components, including a central integrated circuit (IC), several resistors, capacitors, and surface-mount components. It features four circular mounting holes at the corners. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.

Solder Board-Component View 20	 A photograph of a green printed circuit board (PCB) populated with various electronic components, including integrated circuits, resistors, and capacitors. The board is positioned next to a black metric ruler for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 2 mm. The board is oriented vertically, and the ruler is placed horizontally along its left edge.
Solder Board-Component View 21	 A photograph of the same green PCB from a different perspective, showing the underside or a different side. This view highlights several large, white, cylindrical components, likely electrolytic capacitors, and various other electronic components. The board is again placed next to a black metric ruler for scale, with the ruler positioned horizontally along its left edge.
