

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden bench holds a spectrum analyzer. A red cable connects it to a power line interface unit (PLI) on the floor. The PLI is connected to a power strip on the wall. To the right is a large wooden table.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test chamber. The chamber is lined with white, square-shaped electromagnetic interference (EMI) absorbers. Inside, a metal frame holds a device under test (DUT) on a turntable. A probe is positioned to measure the radiation. The floor is marked with yellow and black safety lines.

**Radiation Emission
View (30MHz to 1GHz)**
