DOOR & WINDOW ALARM
SM-06

Instruction

Thank you for your purchase and placing your trust in Smate Security. Please read the instruction carefully before using the device for the first time and keep it for future reference.

1. Standard packing list

Instructions * 1 Door/Window Alarm * 1
Remote-controller*1 AAA battery*2
3M tape *1

2. Specifications:

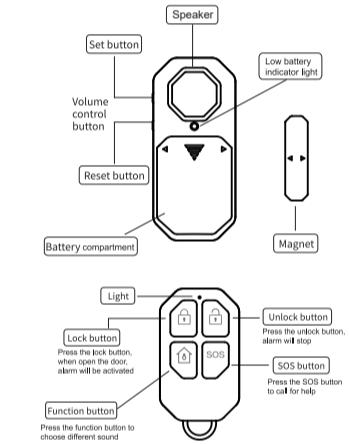

| MHZ: | 433.9109MHz |
|--------------------------------------|---------------------|
| Environment humidity: | < 90% |
| Working temperature: | -10~60°C |
| Decibel: | 14dB |
| Battery in Alarm device: | 2 pcs AAA battery |
| Battery in Remote-controller device: | 1pcs CR2032 battery |
| Remote control distance: | >25m |
| Alarm device Standby: | 1year |
| Remote-controller device Standby: | 1year |
| Remote-controller device weight: | 15g |
| Alarm device weight: | 69g |
| Alarm device size: | 100*45*22mm |
| Magnet size: | 45*12*17mm |
| Remote-controller device size: | 60*36*14mm |

The device emits an "alarm sound" and light flash quickly, both off when the door/window is closed or disarmed;

3) Reminder mode: "high and low Volume beep sound" with flashing light, enter the reminder mode. When the door/window is opened, the door sensor emits "high and low Volume beep sound" with flashing light, both off when the door/window is closed or disarmed;

4) Ding-dong mode: "ding-dong sound" and flashing light, enter ding-dong mode, when opening the door/window, there will be "ding-dong" sounds, and the light flash;

5) SOS mode: "SOS sound" and flashing light, enter SOS mode, when opening the door/window, there will be "SOS" sounds, and the light flash;

6) Volume setting mode: "volume sound" and flashing light, enter volume setting mode, when opening the door/window, there will be "volume" sounds, and the light flash;

7) Low Power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

8) Disarm mode: "disarm sound" and flashing light, enter disarm mode, when opening the door/window, there will be "disarm" sounds, and the light flash;

9) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

10) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

11) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

12) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

13) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

14) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

15) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

16) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

17) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

18) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

19) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

20) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

21) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

22) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

23) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

24) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

25) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

26) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

27) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

28) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

29) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

30) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

31) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

32) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

33) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

34) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

35) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

36) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

37) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

38) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

39) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

40) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

41) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

42) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

43) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

44) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

45) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

46) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

47) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

48) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

49) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

50) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

51) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

52) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

53) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

54) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

55) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

56) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

57) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

58) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

59) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

60) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

61) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

62) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

63) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

64) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

65) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

66) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

67) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

68) Low power warning mode: "low power sound" and flashing light, enter low power warning mode, when opening the door/window, there will be "low power" sounds, and the light flash;

69) Standby mode: "standby sound" and flashing light, enter standby mode, when opening the door/window, there will be "standby" sounds, and the light flash;

70) Remote control mode: "remote control sound" and flashing light, enter remote control mode, when opening the door/window, there will be "remote control" sounds, and the light flash;

71) Learning mode: "learning sound" and flashing light, enter learning mode, when opening the door/window, there will be "learning" sounds, and the light flash;

72) Disconnection mode: "disconnection sound" and flashing light, enter disconnection mode, when opening the door/window, there will be "disconnection" sounds, and the light flash;

73) Self-test mode: "self-test sound" and flashing light, enter self-test mode, when opening the door/window, there will be "self-test" sounds, and the light flash;

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
