Weight: 69g (2.85oz)

Alarm Volume: 80dB

Battery Life: 2 years (with no alarm)

Power: 2*AAA Batteries

Operating Temp: -4°F to 158°F (-20°C to 60°C)

Network : Bluetooth 4.2 or above

Troubleshooting

Problem	Possible Cause	Solution
Gateway cannot connect to Wi-Fi.	Gateway does not support 5GHz Wi-Fi.	Connect the gateway to 2.4GHz Wi-Fi.
	Wi-Fi contains special characters.	Change the Wi-Fi name and password.
	Wi-Fi is out of range.	Keep the gateway and router within 100m.
The thermometer doesn't work.	Gateway is offline.	Shorten the distance between the gateway and router.
	Battery is dead.	Replace the battery.

The thermometer sends delayed alerts or does not alert.	App doesn't have permission.	Enable notification permissions for Govee Home App.
	The interval of anti-false alarm mode is long.	Set to shorten the anti-false alarm interval.

Warning

1. The device should work in an environment with a temperature ranging from -20°C ~ 60°C and humidity from 0%RH to 99%RH.
2. Do not disassemble the device violently.
3. Do not immerse the device in the water.

4. Repairs may only be carried out by properly qualified specialists. Pay attention that the Gateway is set up in the vicinity of an easily accessible power socket so that it can be disconnected from the power supply in an emergency. Never handle the Gateway with wet hands and avoid any contact with water.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- (1) Reorient or relocate the receiving antenna.
- (2) Increase the separation between the equipment and receiver.
- (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- (4) Consult the dealer or an experienced radio/TV technician for help.

RF warning statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

IC Statement

This device complies with Innovation, Science and Economic Development Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme aux normes RSS exemptées de licence d'innovation, sciences et développement économique Canada. Le fonctionnement est soumis aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
