

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer sits on a wooden desk, displaying a graph on its screen. A red cable connects it to a power line interface unit (PLI) on the floor. To the right, another wooden desk holds a digital scale with a blue display and a keypad. The background shows a plain wall with electrical outlets.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The interior walls are lined with white, square-shaped electromagnetic interference (EMI) absorbers. A small electronic device is placed on a white stand in the center of the chamber. The floor is made of large, grey metal tiles. A yellow and black striped safety line is visible on the floor. A metal frame is partially visible in the foreground.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
