Trouble Shooting

a) APP can not find the device.

- Make sure the phone bluetooth is on.
- Allow the permissions of APP. APP needs them to connect.
- Check the light is on.
- Kill APP, turn off bluetooth and turn on bluetooth again, then start APP to add device again.
- Ensure phone within 4ft from product when connecting.
- Your phone may be incompatible with the APP, try another phone

b) Failed to connect to WiFi.

- Check WiFi supports 2.4GHz. Not 5GHz.
- Reset device by power on and off 3 or 4 times until light flash.
- Bring device close to WiFi router to improve signal.
- Add device and connect it to WiFi again.

c)Device not shown on Alexa APP

- Remove device from DayBetter APP and add again.
- Unlink Alexa, and Link Alexa again.

d) All lights don't work.

- Check power is on.
- Press ON and press "brightness up" multi times on remote.
- Connect APP and turn on light and turn up brightness.

e) Some light beads keep off or fail working.

- Contact our support team.

Attention

- Use the product with provided adapter and control box only.
- Do NOT extend more strip to avoid overload which is unsafe.
- Do NOT bend strip otherwise beads and parts may damage.
- Please turn off the power and unplug the adapter when the strip light will not be used for a long time.

Customer Service

If you have any questions or product issues, please contact us via the email on the package or get the product support on the order page in your purchasing account.All messages will be replied within 24 hours.

Information to User

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

manufacturer responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Information
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Important:

Change or modifications not expressly approved by the manufacture responsible for compliance could void the user's authority to operate the equipment.
