## I. Planar Structure Diagram (Unit: MM)

## II. Product Parameters

Pin Position	Wire Diameter	Number of Turns	Remarks
1 - 2	0.08*24P	10T	Hot-air stranded wire

## III. Technical Requirements

1. Secure the wire ends to prevent loosening or breaking.
2. Cut excess wire ends as required by the customer, tin them, with a tinning depth of  **$2 \pm 1$ MM**.
3. Apply an appropriate amount of white glue to the magnetic sheet and attach the coil, ensuring the product surface is clean and tidy.
4. Use hard magnetic sheets with round holes and no damage.

5. Additional processes (as required by the customer): Install a **7.65×2.0MM magnet** in the middle round hole of the finished product, attach **513-14MM adhesive tape** to the back, and then package.

#### IV. Electrical Parameters

Inductance value and Q value:

PIN 1 - 2 = 4.1uH ±0.3uH

Q value ≥25

*Above inductance and Q value are measured with a Quanhua 1062A instrument or equivalent, at 100KHZ/1.0Vrms.*
