

Microphone

Frequency:206.2MHz

How to install or replace the VHF microphone's batteries

Screw off the bottom half of the microphone and insert two AA batteries (not included) into the proper slots. Screw the covering back on, and proceed to power on the microphone as directed above.

How to turn the microphones on/off

For both the wireless and the wired microphone, slide the power switch up to turn the microphone on. Slide the power switch down to turn the microphone off.

Note: The wireless microphone has an indicator light. If this switch is not pushed all the way up, the indicator light will not turn on, and the microphone will remain off.

How to use PA mode

When there is no music playing, this machine can be used to make PA announcements. Simply speak into a microphone by ensuring that it is properly connected as instructed above.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
