Transmitter	Receiver	Wall Plug

Garage Door Minder Auto Pairing Instructions

1. Remove from packing, start with transmitter first. Pull battery tabs and now put transmitter in transmit Mode (see figure-1) setting down with Velcro facing up. You should be able to see the battery door.
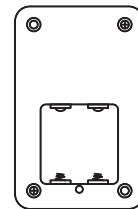

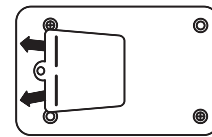

Fig. -1

2. Plug light stick receiver into provided wall plug adapter and Into wall outlet. (see figure-2) Now light stick is in auto pair for 30 seconds, do not interrupt. Leave transmitter in Transmit mode and light stick in auto pair. After 30 seconds It will finish. If you see solid lights or hear solid beep it Will stop and go back to blinking and beep when finished. To test after pairing flip transmitter over with label facing Up, light stick will stop, then flip back over and they will start beeping and blinking again, pairing is finished.
