The Box

LinkedSparx Technology Co., LTD

Made in China

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio technician for help.

To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body. Use only the supplied antenna.

What's in the Box?

- 1

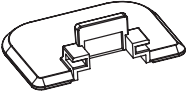

The Box Modules x 50
- 2

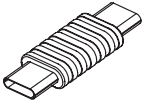

3-Output Controller with 1.5m USB Cable x 1
- 3

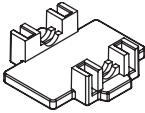

RF Remote Control x 1
- 4

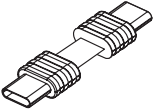

Stands x 2
- 5

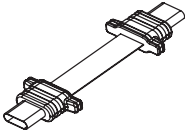

Type-C Connectors x 50
- 6

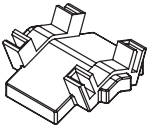

Fixtures x 50
- 7

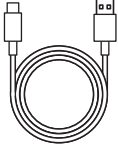

Type-C Flexible Connectors x 4
- 8

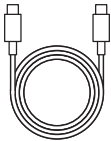

6cm Type-C Flexible Connectors x 1
- 9

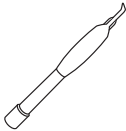

Angled Fixtures x 5
- 10

2m USB-C Cables x 1
- 11

1m Type-C Cables x 1
- 12

Pry Bar x 1

- 13

Hook & Loop Adhesive Tapes x 10
- 14

Stickers x 9
- * The power adapter is NOT included in the kit. You can use a standard 5V USB charger or a power bank. An output of 5V 1~2A is recommended.

The Box Modules

Module Dimensions	
a	5.6cm / 2.2in
b	5.6cm / 2.2in
c	2.4cm / 0.94in

- Color: RGB 16 million colors
- Connectivity: BT
- Working Voltage: 5V/2A
- Max Panels Per PSU ~ 100
- Max Panels Per Controller on a route: 300
- Materials: Fireproof Polycarbonate & ABS
- Operating Temperature: -5~45°C
- Life Span: More than 20,000 hours

Controller

RF Remote

App Download

Please scan the QR code to download the 'LED SMART' App.

Download on the
App Store

GET IT ON
Google Play

1. Download and install the "LED SMART" App.
2. Go to 'Settings' of your mobile device and turn on BT.
3. App automatically searches and lists all available SYRO devices nearby. Select your device to connect, then you can fully control The Box.

- * Generally, you can control up to 5 devices simultaneously. This may vary from different phones.

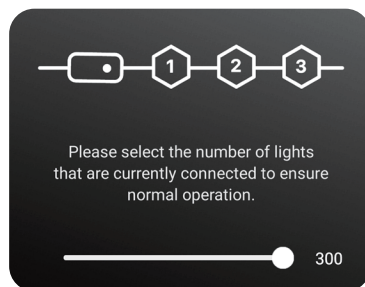

* The user interfaces provided above are for reference only, and might be different from the latest version of the App.

Online Guide

For more detailed features about the App, please visit www.linkedsparx.com/syro-app

*This application requires iOS 10.0 or later / Android 4.4 or later.

MUST READ Before Installation

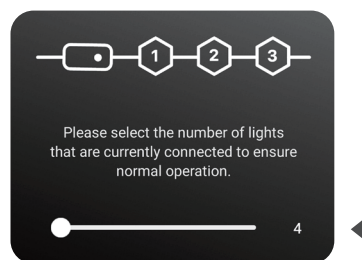

To accurately perform all light effects on your layout, our App lets you decide the sequence number of modules you wish to control or multiply.

How to count the sequence number of light modules

If you connect 2 or 3 modules to the previous module, these newly connected (next-tier) modules will receive the same command from the previous one, therefore display same and synchronized effect.

You need to count the number of modules connected in the longest line. As you can see from the example below, you should set the sequence number as 4.

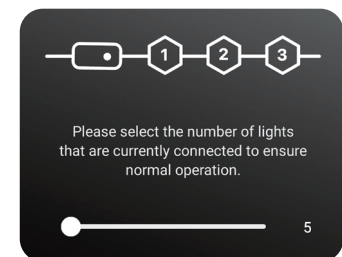

The sequence number you set should either be the same or less than the number of all connected modules.

How to multiply light effect

It is also possible to set a small number than your actual setup. The App can automatically duplicate effects for the following segments.

For example, if you have 10 modules connected in a line and set the number as 5, the 2 segments of modules will play the same effect.

Each module has 1 input and 3 outputs. You can easily find the input with an arrow ↓ mark on it.

Please always plug the power + signal incoming source into the input. Be aware that improper connections could cause malfunction, such as modules not lighting up or uncontrollable.

How to Create Your Own The Box Layout

Firstly create your layout on a flat surface and designate a module as the starting module.

When you are satisfied with your layout, attach connectors between modules.

*There are 50 connectors in the kit.

Then use a Type-C cable to connect the controller to the starting module.

5V 2A power adapter or
other 5V 2A USB power source

* A power adapter IS NOT included and needs to be prepared by yourself.

All modules lighting up indicates a correct connection.

- ⚠ If no modules light up, please check if the controller and the power adapter are connected properly.
- ⚠ If certain modules DO NOT light up, please make sure you connect the input and output between modules correctly.

- ⚠ A power supply with 5V 2A output can carry 50 modules.

If you wish to connect more than 50 modules, you can plug a charger or power bank with a Type-C port into any output port of a module to provide extra power supply.

Theoretically speaking, you may extend your layout to up to 300 modules in a single line with enough power supply.
