Power on:
The earphones automatically power on when they are taken out from the charging base. The blue light on the earphone is on for 1 second.

If you don't want to use the TWS earphone anymore, placed back the TWS earphones to the charging base and they will shut down automatically with the earphone LED red light on for 1 second.

- After power on, close the left and right earphones (less than 3cm), when the left earphone and right earphone is connected to each other successfully it will be a beep sound "Dong", and then: host earphone LED light is the red and blue lights flash alternately, and the slave earphone LED light flashes blue slowly, which means that the earphones are ready for the pairing mode.
 - Now turn on the smartphone Bluetooth function, find the pairing name: JX05, and click to connect the smartphone with the JX05 TWS earphone. After they are paired and connected successfully, the host earphone LED blue light will flash slowly, now you can enjoy the music cablesless!
- Note:** Please be noted that the earphones will automatically powered off if they are not paired to any BT device in about 5 minutes.

Take any one earphone out the R and L earphones from the charging base, they will connect with each other automatically. Now turn on the smartphone Bluetooth function, find the pairing name: JX05 and click to connect the smartphone with the JX05 TWS earphone .After that ,put any one earphone back to the charging base, the other earphone will automatically connect with your smartphone. Now you can only use one earphone!

The phone is not connected to the six-click headset to restore factory settings

With Hall switch function, put the earphone into the charging compartment, close the cover, earphoneTo start charging.

Wear the earphones left and right. Place the earphones with earplugs into the ear canal and turn them gently until they fit comfortably without falling. The wrong way of wearing will affect the signal of the headset and the call of the microphone.

- Please use a USB charger with an output voltage of DC 5V 1A for charging;
- The earphones are with built-in rechargeable lithium-ion battery. The earphone battery must be fully charged before you use it for the first time.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
