

Specifications:

Name: 3 in 1 wireless charging stand

Model: LK-C03B

Input: DC 5V/2A 9V/2.2A

Output: DC 5V/1A 9V/1.66A

Charging power: 5W/7.5W/10W/15W

FOD: yes

Adjustment:

1. Please adjust the height of the circular pad according to your cell phone size, aligning the center of your phone to the lightning icon for optimal charging experience.

2. To charge horizontally, please slide the circular pad to the bottom of the bracket.

Adjust the view angle by pulling or pushing the support bracket.

Indicator:

1. When connected to power, the indicator lights up for a few seconds, then goes out.

2. When in standby mode, the indicator goes out.

3. When charging, the indicator is on.

4. When charging finished, the indicator goes out.

5. When there is an error (foreign subject detected or over high temperature), the indicator flashes.

6. Since the indicator gives no hint as to the charging status of the watch area, please check the watch's screen for sure.

Attention:

When connected to power, if the charger is folded, the indicator may flash and report error because of the foreign subject detection function of the earphone charging area. Please just pull up the support bracket to solve the issue.

FCC Statement

This device complies with part 15. Operation is Subject To the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
