Radar induction+RGB touch+wireless charging multi-function intelligent box

Product introduction

XX1056-1-4The smart RGB box is powered by two USB ports (USB-A, Type-C), Meet the general charging requirements of all mobile phone models. Built in body sensor, Able to detect object approaching within 2m, Enable intelligent induction to turn on lights. With 24 color RGB color temperature, fast charging 15W wireless charging function

Product diagram

Operating Instructions

This touch button realizes the functions of light strip switch, light color switch, light on/off, etc

- A. Touch this button once for each click to turn on and off the lights (The indicator light goes out)
Turn on the light again (Indicator light is on), This cycle. Note that every click and touch of this button will turn off the radar sensing function (The indicator light of the radar button is off).
- B. When any light is on, long press and touch this button to realize the dimming function. The light changes until the touch is released, and the brightness of the light will remain until the next long touch dimming.

This touch button is used to switch the radar sensing function

- A. Click and touch this button once to turn on the radar sensing function (the indicator light is on). After people leave or stay still for more than 30 seconds, the light strip goes out; When the light strip is off, people including objects within 2 meters will light up the light strip.
- B. Long press and touch this button for 0.5 seconds to turn off the human body sensing function (the indicator light is off). At this time, the light strip will remain in the state before it is closed, and will no longer be affected by the activities of people and objects.

This sign area is for wireless charging function, which supports fast charging with a maximum power of 15W. During charging, the product should be placed in the middle of the sign to maximize the charging efficiency.

After power on, the wireless charging function is enabled by default. You only need to place the electronic products to be charged in the wireless charging area to realize charging.

This identification area is a color mixing circle function. You can click any color circle position to switch colors, or you can slide color mixing. The center of the middle color circle is white

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
