Function Introduction

Power On:
emove the earphones from the charging case or, if the earphones are turned off, press and hold for 2 seconds to manually power them on.The white light will blink, and the earphones will emit a "Power on" prompt, indicating that the earphones are now entering the reconnection state.If there are any devices that have previously been paired and are nearby, the earphones will automatically reconnect to that device.If no device is detected, after approximately 8 seconds, the main earpiece will automatically enter the device pairing mode with a "Pairing" prompt, and the white light on the main earpiece will blink, indicating it has entered the device pairing mode.

Wireless Pairing
Turn on your phone and enable wireless, then refresh the wireless device list to find the "KLV-62" device.Tap on the device to pair with it, Once connected successfully, the earphones will emit a "Connected" prompt, and the main and secondary earpiece's white lights will stay on steadily.Your phone will display that the earphones have connected.

Power Off
Place the earphones into the charging case to power off and charge automatically / To power off manually while in the on state, press and hold for 5 seconds (manual power off will sync both the main and secondary earpieces), the orange light will stay on for 1 second, and the earphones will emit a "Power Off" prompt.

Factory Reset
If pairing is disrupted and needs to be restored, touch either earbud 5 times continuously without a Wireless connection; the white and orange LED indicators will flash rapidly. The earbuds will reset to factory settings. Wait about 10 seconds and then reconnect the device following the wireless pairing steps.
