Declaration of Similarity for LS200-915-A and LS300-915-A

This is to confirm that the Lacuna Space product models LS200-915-A and LS300-915-A are identical in hardware. All components are populated as can be seen in the BOM, schematics and board layout. The difference in the products is that for the LS200-915-A variant the S-Band functionality is disabled in software. This prevents any transmission or reception of RF signals via the S-Band antenna.

The end user cannot activate the S-Band functionality via user commands.
