View 2**

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'D255A', positioned on a blue textured surface. The component is rectangular and features a grid of 16 circular solder pads arranged in two columns of eight. A black ruler with white markings is placed vertically to the left of the component, showing measurements from 0 to 100 mm. A horizontal ruler is also visible at the bottom, showing measurements from 0 to 200 mm.
Solder Board-Component View 2	 A photograph of the same green PCB component, labeled 'D255A', from a different perspective. It shows the same 16 circular solder pads in a 2x8 grid. The component is placed on the same blue textured surface. A black ruler with white markings is positioned vertically to the left, showing measurements from 0 to 100 mm. A horizontal ruler at the bottom shows measurements from 0 to 200 mm.

Solder Board-Component View 3	 A photograph showing a rectangular copper-colored component with two small circular holes, resting on a blue textured surface. A black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters. The component is positioned between the 10 mm and 20 mm marks on the ruler.
Antenna View	433.92MHz Antenna  A photograph showing a green printed circuit board (PCB) with various electronic components, including resistors and capacitors, mounted on it. A red rectangular box highlights a specific area on the PCB. A red line points from the text "433.92MHz Antenna" to this highlighted area. A black ruler with white markings is placed vertically to the left of the PCB, showing measurements in millimeters. The PCB is positioned between the 10 mm and 20 mm marks on the ruler.
