- FCC Warning -

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

To maintain compliance with FCC'S RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

- Installation Guidance (details) -

Before installation , Please test and confirm both cam can be used well. (please use our cigarette lighter charger to charge)
Any question please mail with us : milerong_service@163.com

(If there is a problem with the dash cam before installation, you can contact with us to deal with it in time without wasting installation time. If there is a problem after installation, it can also be ruled out that it is not a machine problem but an installation problem.)

- Install Front Cam -

Connect the car charger to the camera and the cigarette lighter, hide the rest of the cable in the gap of the Interior trim board.
(If you want to use the rear cam , please plug the AV-IN port rear cable before turn on the dash cam)

The camera will auto-start recording once powered on.

◆ Insert the Memory Card

Gently push the memory card in until you hear a click, and allow the spring release to push the card in/out.

 Please insert the card in the right direction.

 Please format the SD Card at first time using.

(please confirm the direction of SD Card firstly)

◆ Mount the Front Cam onto the Windshield

① Clean the front windshield

② Install the suction cup

③ Adjust the angle of item

You can rotate the camera 360° to record to record the your preferred direction.

④ Install the suction cup on the windshield and lock it

Remove the protective plastic film from the 3M bracket, then align it in the right place of windshield and stick it on firmly.

⑤ Connect the power

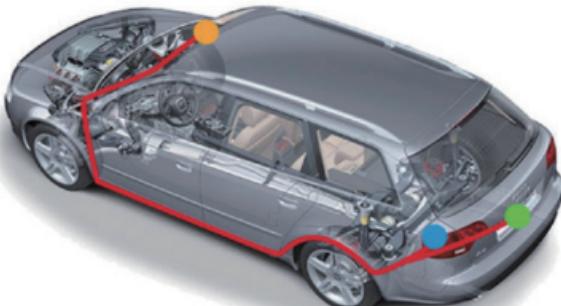

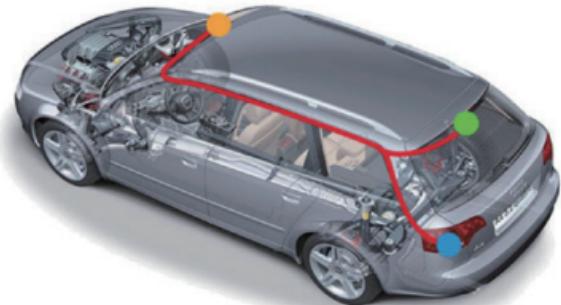

- Install Rear Cam -

There are two ways to place the camera.

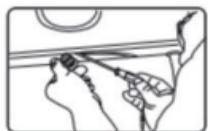

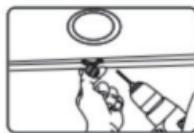

Way 1: Mount on the rear windshield. There is a 3M glue in the package for the rear camera. Please clean the rear windshield and find a suitable position, then paste the rear camera on the windshield.

Way 2: (Recommended!) Install it near the license plate. There are fixing screws inside the package to help you fix it

◆ Detail on Rear Cam Installation

① Select a flat and central place that near the number plate lamp at the rear of the vehicle.

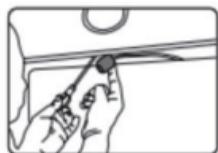

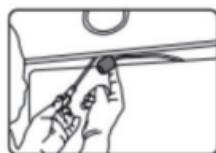

② Attach tape to the bracket of the camera to hold the camera in position while installing, and drill two small holes , one for the first screw, the second to run the reverse camera.

③ Use a screwdriver to fix the first screw leaving the screw loose enough to adjust the camera.

④ Insert the camera wire through the intended drilled hole, checking the installation position.

⑤ Mark the place that suitable for the second screw and drill a small hole for it.

⑥ Fix the second screw and securely tighten both screws.

Need using these accessories during installing the rear cam

⑦ After the installation is completed, connect the rear plug to the rear camera interface of the recorder.

Then start the car engine to turn on the dash cam front and rear.
(if turn on front cam firstly then connect rear cam to dash cam ,maybe will lead to short circuit black screen - reboot dash cam maybe can fix this problem)

- Menu Setting -

First, press once "M" Button to enter menu setting interface

Second, press "left" or "right" button to select other more funtion.

Third, press "OK" to enter and confirm the options.

And Press "M Button" to return previous step.

Note: If your phone connect the dash cam, you can't operate on the dash cam, please close the wifi and disconnect your phone first.

[Resolution]

Choose "Resolution", press "OK" button enter below picture:

Way 4 to Playback on Phone

Connect dash cam wifi , then playback the video on your phone, details please see page *05 - How to Connect Wi-Fi

- Questions & Answer -

1 Q: The camera can not record video or take photos?

A: Be sure you are using suitable SD card: Speed over Class 10. Format your new SD card on the dash cam when first use!

2 Q: Camera power off after a few seconds.

A: Make sure to keep the camera plugged into power for daily use because the internal battery is designed to save your personal settings. If the dash cam still powers off after connecting to a usable power cord, please contact us for help.

3 Q: The camera automatically stop recording?

A: Format the SD card.

The G-sensor might be triggered too often and locks too many video files, try lower sensitivity.

4 Q: The camera can not turn on?

A: This camera features a built-in battery as internal power, it's used only for saving the videos file after external power supply cuts off (car turn off). This camera will not turn on without external power supply.

Check the power supply, make sure they are connected properly, power indicator on the power adapter is on, and the connectors are tight.

5 Q: Suction mount cannot attach on windshield well?

A: Please clean the windshield with a glass cleaning wipe. Removed the protective film.

Please soak suction mount to warm water for a moment. If it is still not working, please contact seller after-sale service to get a replacement.

6 Q: The rear cam cannot display?

A: (1). Please switch the camera display mode to double check the rear camera status.

(2). Please check whether the TYPE-C plug is in place and the cable is connected correctly.

(3). Try to disconnect the camera and clean the connector with some Medical alcohol and connect it again.

7 Q: The camera crashes or not responding to operations?

A: Use a pin or and unfolded paper clip, press the RESET button to restart the camera.

8 Q: I can't delete files on my SD card within the dash cam.

A: Check if these files are "locked". If so, please delete the files by manually.(Delete on PC or Format the files on dash your dash cam. Or you can unlock the files. Select locked files,press menu button,then press OK button, and then select unlock current or unlock all. It is optional!)

9 Q: Cannot see the reversing guide image when reversing.

A: Please check the wiring and make sure the RED LINE of rear camera is correctly linked to the POSITIVE ELECTRODE of the reserve light.

10 Q: Can not move the SD card.

A: With the card previously installed, you now need to push the card further inwards slightly, using your finger nail,until you hear and feel a small latch. Use the edge of a small coin if you have difficulty. Release pressure and the card will spring out sufficiently for you to take hold of it.

11 Q: The camera gets HOT?

A: It is normal for your camera to run slightly hot. Due to it is recording video at high speed, the dash cam maybe hot during using. (no more than 170'F/75C)

12 Q: Making Annoying sound?

A: Because the radio will transmitting frequency, the radio is magnetic, it will be interference for electronic products. If the two products are too close, they will interfere with each other. You can move the driving recorder to a position slightly away from the radio. Then it will not interfere each other and won't make a buzz buzz sound.

Low battery will also lead to buzzing sound. Please keep charge the dash cam for a while.

13 Q: Dash Camera Freezing/Lagging or Crashing?

A: Use a pin or unfolded paper clip, press the RES Button to restart the camera. Now the dash cam should turn ON.

If it still doesn't turn ON, then please CONTACT US.

14 Q: Color of the video or photo is not good?

A: Verify that Frequency option is set to 60Hz (North America) or set accordingly.

15 Q: Rear cam cable not longer enough.

A: If you need the extension cable for your Van/SUV, Please feel free contact with our seller to get one:

- After-Sales Service -
