Please Provide the detailed Description:

- Why the product needs to have different enclosure?  
We are collecting inputs and designing a better enclosure with easy mounting option, wider view of the products in the opposite shelf considering different types of shelves and option to change the price rail easily while the ParSEC is mounted on the shelf. We will also attain feedback from store post pilot installation and the suitable enclosure model will be selected for the production.
- What is the difference between each enclosure type?  
The differences are mainly with respect to the mounting and the dimensions of the front (Camera) portion of the enclosure. It is for improving aesthetic look.
