Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

To whom it may concern:

Neuvotion Inc., hereby requests a Permissive Change Class II of the radio equipment certification for the Neustim™ Model NN-01 certification number, FCC ID: 2A8GSNN-01. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry – no changes.
- (b) Functional capabilities – no changes.
- (c) Antenna Characteristics – no changes.
- (d) Cosmetic differences – no changes.
- (e) Other – Add new portable host-specific enclosure; change of RF Exposure Category.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Chad Bouton
