

Description

The Medesto Go is an FDA Class 1 medical device capable of providing audible chimes for alerts and / or reminders for pre-determined medication dosing schedules. The Medesto Go identifies the medication being managed by the patient through scanning an NFC tag on the outside of the medicine container. The Medesto Go communicates via LTE (Cat M1) to help track and record a patient's usages and activities. This device has been tested and found to comply with Part 15 Class B of the FCC Rules.
