

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. On the left is a black plastic housing with a white flexible circuit board (FPC) and a yellow tape. On the right is a black circular component with a silver ring. A black ruler with white markings is placed below the components for scale.
Solder Board-Component View 1	 A photograph showing a green printed circuit board (PCB) with various electronic components. A white flexible circuit board (FPC) is connected to the PCB. A black ruler with white markings is placed below the components for scale.

Solder Board-Component View 2	 A photograph showing a circular black component with a central hole and two thin white wires extending from it. The component is positioned above a green printed circuit board (PCB) which has several surface components. The assembly is placed on a blue textured surface. A black L-shaped ruler with white markings in millimeters is visible on the left and bottom edges of the image.
Antenna View	Coil Antenna  A photograph showing the same assembly as the previous view, but from a different angle. The circular component is now clearly visible as a spiral coil antenna. A red rectangular box highlights the coil, and a red line points from the text 'Coil Antenna' to it. The green PCB and the blue background are also visible. A black L-shaped ruler with white markings in millimeters is visible on the left and bottom edges of the image.
