

Magnito Mouse

The World's First Magnetic Attachable Bluetooth Mouse User's Manual

FCC ID: 2A8OG-VM-M300S

This device complies with part 15 of the FCC Rules.

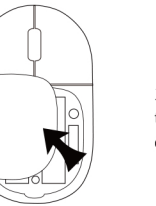

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

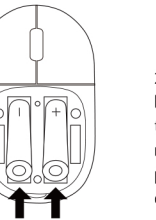

Please be advised that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

VM-M300S

How to insert the battery

1. Open the cover of the mouse battery compartment.

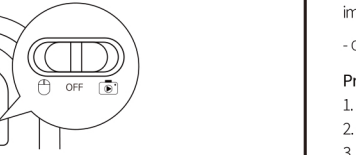

2. Insert two AAA batteries, making sure the positive and negative ends are pointing in the right direction.

* 1 *

How to switch on and off

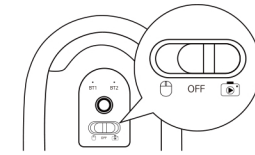

1. The On/Off switch is located on the bottom of the mouse. The switch is for the mouse mode if you place it on the left side; the switch for the remote control mode is on the opposite side.

2. Turn off the mouse by moving the On/off switch to the middle position.

* 2 *

Remote control mode

- Change into remote control mode**
·By turning the switch to the left, you can activate the remote control mode.

Camera mode

1. Start the camera application.
2. Click the side button of the mouse to start capturing the image.

- Only smartphones and tablets, not computers, can use this feature.

Presenter mode

1. Start the Powerpoint slide show.
2. Click the side button to move to the next slide.
3. To navigate to the previous page and the next page, use the mouse scroll wheel.

·Android and Mac OS only support presenter mode.

* 3 *

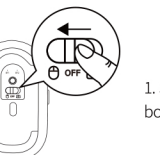

Media Player mode

1. Start the media player.
2. Use the left mouse button to switch to the previous track.
3. Use the right button to switch to the next track.
4. Use the scroll wheel to adjust the volume.
5. Use the scroll wheel to play and stop the app.

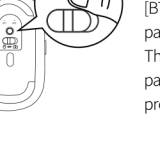

* 4 *

How to connect bluetooth pairing

1. Slide the power switch on the bottom of your mouse to ON.

2. To switch an LED indicator to [BT1] or [BT2], click the mouse pairing button. The LED blinks swiftly to enter pairing mode after 3-5 seconds of pressing the pairing button.

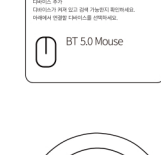

* 5 *

How to use multi-pairing mode

1. Complete the pairing on any of your devices in [BT1] mode. (For information on pairing the device, see instructions above.)

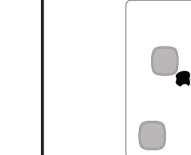

2. Complete the pairing on any of your devices in [BT2] mode.

* 6 *

How to attach the mouse

- Smart Device without a magnet (ex. Laptop)**
· Magnito pad can be attached to any smart device without a magnet.
· The mouse will stay in place more firmly if you place a magnito pad on the magnetic device.

How to attach the Magnito pad
