

User Manual Of DC Fan Lamp Remote Control

No. 22040078

- ① ON/OFF the Light
- ② ON/OFF the Fan
- ③ Speed of the Fan
- ④ Reverse switch
- ⑤ Natural wind
- ⑥ Temperature control
- ⑦ Anti-theft Light
- ⑧ Delay closing Fan and Light
- ⑨ Timing control

Note: The remote works with battery 1.5V AAA x 2pcs
(not included)

Instruction of transmitter and receiver:

1. If the remote control can't control the fan, please reset the matching mode between transmitter and receiver.
Switch on electricity for the fan, make transmitter point to receiver, and press the ON/OFF Fan button " " on the remote control until hearing "bee", the match is done successfully.
Note: the match has to be done within 10 seconds after the power electricity has been given to FAN, otherwise the fan will skip the matching mode.
2. Please check the following cases if the match fails:
 - check battery polarity and connection in transmitter;
 - if there is any other similar remote control nearby, because the same work frequency of remote controls will interfere each other
3. Please take battery out from transmitter and remote control, if the fan won't be used for a long period.
4. Don't squeeze signal wires, it would damage them and cause short-circuit.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The device has been evaluated to meet general RF exposure requirement, the device can be used in portable exposure condition without restriction
