

FCC User Manual & Quick Start Guide_G6A87E

Product Specifications

- Model Number: G6A87E
- Power: 9.0 Vdc 1.4 A output power adapter (in-box)
- Operating temperature: 0°C to 35°C
- Connectivity: Dual Band Wi-Fi (2.4/5 GHz), 802.11 a/b/g/n/ac; BT BDR/EDR, BLE, 902-928MHz, Zigbee

Quick Start Guide

Included in the Box:

- Device
- Power Adapter
- Power Adapter USB cable
- Wall mount bracket and its template
- 2 screws
- 2 screw anchors

Set up your device

1. Connect the device to the wall outlet using the usb cable and the power adapter.
2. In the start screens, connect to the home Wifi by selecting the SSID from the login screen and inputting a password, if required.
3. Follow instructions on the screen to complete set up.

Mounting your device on your wall

1. LEVEL AND TAPE TEMPLATE TO THE WALL: Use the mounting tips and the included mounting template to identify where to mount your device. Place the template on the wall. Make sure the triangle is at the top. Use a level or a level app on your phone to level the template. Tape the template in place.
2. DRILL HOLES AND INSTALL ANCHORS: Using an electric drill, drill through the designated holes in the template. Remove template after drilling holes. Slowly hammer each of the 2 anchors into the holes until they are flat against the wall
3. INSTALL WALL MOUNT: Place the wall mount against the wall with the triangle cutout on top, and line up the 2 holes with the installed anchors. With the Phillips driver bit, drive the screws through the wall mount holes until they are flat against the wall mount.
4. PLUG SUPPLIED POWER CORD INTO DEVICE AND SLIDE DEVICE ONTO MOUNT: Once the device is mounted on the wall, you won't be able to access its power port. DO NOT plug it into an electrical socket yet. Place the device flat over the top of the wall mount and slide it down, ensuring that all 4 hooks in the wall mount are engaged with the device. Make sure the device is placed with the buttons on the right

Product Information

Safety and Compliance Information

Using Your Device Around Other Electronic Devices

The Device, uses, and can radiate radio frequency (RF) energy and, if not used in accordance with its instructions, may cause interference to radio communications and electronic equipment. External RF signals may affect improperly installed or inadequately shielded electronic operating systems, entertainment systems, and personal medical devices.

While most modern electronic equipment is shielded from external RF signals, if in doubt, check with the manufacturer. For personal medical devices (such as pacemakers and hearing aids), consult with your physician or the manufacturer to determine if they are adequately shielded from external RF signals.

There are some places where RF signals could constitute a hazard, such as health care facilities, and construction sites. If you are not sure, look around for signs indicating that two-way radios or mobile phones should be turned off.

FCC Compliance Information

Radio Frequency Information

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications that are not expressly approved by the party responsible for compliance could make the device no longer comply with the FCC Rules.

Information on your device is on file with the FCC and can be found by inputting your device's FCC ID, which can be found on the back of Device, into the FCC ID Search form available at transition.fcc.gov/oet/ea/fccid.

Information Regarding Exposure to Radio Frequency Energy

This equipment complies with RF exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator & your body.
