Note: The format of the U disk must be FAT32, otherwise the device will not recognize the U disk.

Smart Glass Door Lock (Instruction Manual)

Note: The picture is for reference only, please refer to the actual product.

Please read the manual carefully before use and installation, and keep this manual for future reference.

Introduction to Smart Glass Door Lock

The product is newly upgraded and iterative, adopts an elegant and stylish design; the core adjustment of lower power consumption and long battery life, equipped with a new generation of clutch motor, protects the device with a longer service life; has a variety of high-end configurations: face recognition, semiconductor fingerprint sensor, IC card, mobile phone NFC, anti-peep password, attendance report, etc.; carefully create smart and convenient glass door locks, bringing you the fun of integrating technology and life.

Face recognition unlocking (only face models support)

Faster algorithm recognition, faster unlocking. Infrared fill light, no fear of night, dual cameras, automatic switching between color and black and white images.

Palm vein recognition and unlocking (only supported by some model)

A new generation of palm vein algorithm, which can be unlocked by raising your hand, making the identification more secure. Do not take off the mask and do not press fingerprints to achieve contactless unlocking.

Semiconductor fingerprint sensor

Adopt semiconductor fingerprint sensor with higher sensitivity and faster recognition, it can effectively prevent fake fingerprint copying.

IC card, mobile phone NFC unlock

Authorized IC card, users can easily swipe the card. Support Huawei, Honor, Xiaomi, OPPO, VIVO and other brand mobile phones, smart watches, smart bracelets NFC function, temporarily do not support IOS devices.

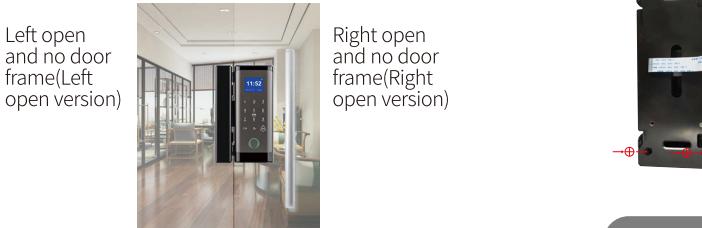

Clutch motor protection

Double protection to avoid damage to gears and motor burnout, stable current, block speed, low power consumption and longer service life.

Time Attendance function (only supported by some models)

Access control and time attendance two-in-one, professional attendance report (SSR) .

Glass Lock Installation Scene

How to adjust the left and right opening direction

1. Remove the screws on both sides of the master lock, remove the rear case, and then remove the 4 fixing screws on front case.
2. Separate the U-shaped bracket and the front shell, rotate the bracket 180° and install it.
3. The rear shell is also rotated 180° then install it, finally, the left and right exchange is completed.

How to disassemble and assemble the cable correctly

1. When removing the cable, first use your fingertips to gently push the locks on both sides out, and then pull out the cable.
2. When inserting the cable, the contact surface needs to face down. After inserting the cable, gently push the lock catch.

Note: need to pull and push gently to prevent the lock catch from breaking.

Side strip install

Install the master lock according to the method on the previous page

The magnet is aligned with the center of the manual knob and tightened with self-tapping screws

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
