

- You will be ready to play with friends and presented with the option to **JOIN AN EXISTING LOBBY** or **CREATE A NEW LOBBY**.

- To create a new lobby, enter your chosen lobby name and click **CREATE**.

- To enter an existing lobby, enter the lobby code and click **JOIN**.

- As a host, you can share the lobby code with your friends using the share button in the top-right hand corner.

- If you are hosting a game, you can **CHANGE GAME / CONFIGURE GAME** and change the **GAME RULES** using the corresponding buttons, as found towards to the top of the screen. You can **ADD LOCAL PLAYERS** using the button at the bottom of the screen. Lobby settings are changed by clicking the Gear symbol in the top-right hand corner of the screen.

- When you are ready to play, tick the box next to your player name until you see a green tick.
- Once all players have loaded up, the host presses **CHOOSE TEAMS** you will all be taken to a Who's playing screen. Here the host can choose the teams the players are in and the order in which they will play.
- The host can randomly select the player order by clicking **SHUFFLE**.
- Press **START** to commence game play.
- Press **YES** to begin or **NO** to go back.
- The game will commence and it will automatically rotate your screen to landscape for optimal performance. Enjoy!
- The maximum conducted output power of the product is 1.00W.
