

# Instruction Manual For Remote Controller

The power On/Off functions and lighting modes can be controlled with either the remote control or the foot pedal.

## Remote Control

Three static lighting modes: Soft White, Day Light, Bright White. Brightness adjustment and color temperature adjustment by remote Control only. Long pressing of +/- will achieve color temperature and brightness you want.

## Twinkling Mode

Two twinkling lighting modes: Soft White Twinkling and Bright White Twinkling.

## Fade/Flash Mode

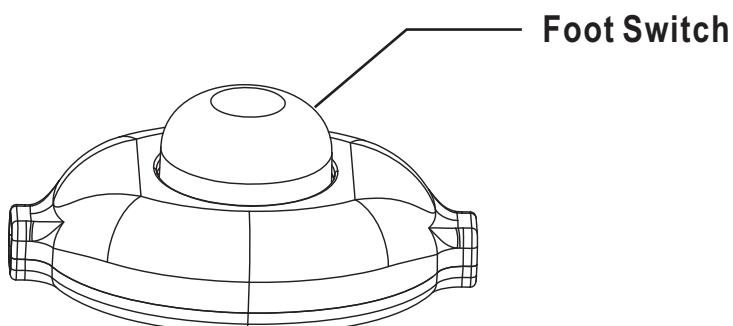

Two fade lighting modes: Soft White slowly transitions to Bright White And Twinkle Flashing.

## Night light Mode

One lighting mode: functions as a night light effect.

## Timer Mode

Pressing will activate lighting timer for 5 hours. At the end of 5 hours. The lights automatically turn off. The lights will automatically turn on the next evening at the same time.

**Caution:** The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
