

Safety Human Exposure

1.1 Radio Frequency Exposure Compliance

1.1.1 Electromagnetic Fields

RESULT:

Pass

Test Specification

Test item	: RVDOORLOCK-Black
Identification / Type No.	: RVDOORLOCK-001
FCC ID	: 2A92CRVLOCK0130
Test standard	: CFR47 FCC Part 2: Section 2.1093 FCC KDB Publication 447498 v06

Measurement Record:

$$\text{EIRP[dBm]} = \text{E[dBuV/m]} - 95.2$$

Since maximum peak output power of the transmitter is $-27.56 \text{ dBm} \approx 0.001753 \text{ mW} < \frac{3 \cdot d}{\sqrt{f}} = 22 \text{ mW}$.

Hence the EUT is excluded from SAR evaluation according to FCC KDB Publication 447498 D01 General RF Exposure Guidance v06.
