Re: **Request Class 2 Permissive Change**

Dear Examiner,

This C2PC request applies for FCC ID: **2A93F-M7DB7** which is installed in our device HS2, the Heart Seat. In addition to the Wireless WiFi/BT Module above, HS2 has an additional LTE Module, SARA-R510S-00B, installed in the system as well. I attest that this LTE Module remains disabled as part of the product and is not being used. This LTE Module was not part of the SAR evaluation for **2A93F-M7DB7** and I attest that the module will remain disabled until proper testing has been successfully completed.

Best regards,

A handwritten signature in blue ink, appearing to read 'David Borkholder', with a long horizontal flourish extending to the right.
