

Cautions:

Mount the sensor vertically in a sheltered location out of direct sunlight and well ventilated. The transmission distance is no more than 328ft(open air). Metal siding, stucco, and some types of glass can greatly hinder the reception of the signal.

FCC ID: 2A9AP-TS01

This device complies with part 15 of the FCC Rules, Operation is subject to the following two conditions:
(1)This device may not cause harmful interference, and
(2)This device must accept any interference received, including interference that may cause undesired operation
