Product parameters

Model name: DP5K and DP5KX

Operating frequency: 2.4G

Charging specifications: 4.8-20V/0.5-3V

Operating voltage: 1.2-4.2V~3.7V

Charge setting current: 500uA~30mA

Operating voltage: 1.2-4.2V

Discharge maximum current: 20A

Charging: Insert 5V charging process

When the charge is complete, change the charging bin fully

Discharge: the process of charging headphones

Discharge complete: the headset is fully charged

Discharge low current alarm when the battery is below 3.3 V

① according to the company's specific development, the function parameters and product contents of the products may be adjusted at any time. The timely updating of the relevant packaging and specifications cannot be guaranteed. The functions and contents of the products in actual use shall prevail.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
