Interactive Mode Usage

Add friends: Click the friend button on the interactive interface.

Step 1: Add friends by gender and age, you can also search by ID number, nickname, mobile phone number,and email.

Step 2: After the search results are displayed, you click the add button on the right, and the system will send the request information to your friend.

Step 3: Your friend click agree,add friends to each other successfully.

Step 4: Click the icon of the friend you want to interact with, and click OK. If the other party accepts your invitation, the interactive connection is successful (Note:If the other party is not connected to the toy, your interactive interface has no control buttons at this time. The toy must be connected to the other party to have control buttons on your interactive interface).
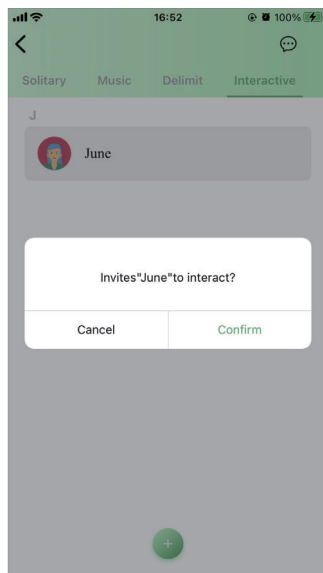

Step 5: After the interactive connection is successful, the video is not turned on by default. You must first invite the other party's video, and the other party agrees to turn on the video function before opening both parties' videos (Note:When interacting, the control button is to control the other party's device, not your own device).

FCC Caution.

This device complies with part 15 of the FCC Rules.
Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received,
including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

RF warning for Portable device:
The device has been evaluated to meet general RF exposure requirement. The device can beused inportable exposure condition without restriction.
