Matters needing attention

1. The measurement results of this product are for reference only and are not used as a basis for any medical user. Please follow your doctor's instructions and do not use this measurement

Results Self-diagnosis and treatment.

2, this product can not be used for deep diving and long time soaking in water. In addition, this product is not resistant to hot water, because water vapor will ring hands

Make an impact.

3. The Company reserves the right to modify the contents of this manual without prior notice

It is normal that the corresponding software version is different.

Basic parameter

Product name: Smart watch

Product model: EBOHR

Body material: Zinc alloy +IML bottom shell

Strap material: silicone

Device requirements: Android 5 or iOS 10.0 or later

Bluetooth: Bluetooth5.2 Be aware of hazards

1, do not charge in a humid environment with water;

2, please ensure that the back of the watch and the wireless charger surface clean and complete contact;

3. Please regularly clean the back of the watch and the surface of the wireless charger with a clean flannel to ensure that the watch and the surface of the wireless charger are in full contact with each other

Ensure normal charging;

4, this product does not have a power adapter, in order to ensure the safety of family and property, when charging, you can use the computer USB interface or choose

Power adapter with output over 5V-1A. Please purchase power adapters through regular channels, and avoid using low-quality and shoddy power supplies

Adapter to avoid burst or fire;

5, the battery (or battery pack) shall not be exposed to high temperature environment;

6, with the wrong type of battery replacement will have the risk of explosion, be sure to dispose of the used battery according to the instructions

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
