1. Scope of Application

This instruction manual applies only to the 4S Smart Battery Remote Control (2.4G) products manufactured by our company. It is a document that specifies the product's relevant parameters and usage instructions.

2. Main Parameter Description

Item No.	Item	Parameter	Remarks
1	Power	Standard 9V Battery	
2	Antenna Type	Foldable Antenna	
3	Remote-control distance	500meter	Open and unobstructed
4	Weight	TYP.52g	Without battery
		TYP.87g	With battery
5	Dimension	136*42*21mm	Without antenna

3. Remote Control Instruction Manual

1. **Power ON/OFF:** There is a slide on the right side of the remote control **ON/OFF**, When the switch slides to the "N" side, the remote control is turned on, and the indicator light is green and solid; When the switch slides to the "F" side, the remote control is turned off, and the indicator light is always off.
2. **The remote control controls the battery to power on:**
 - (1) Turn on the remote control switch to keep the remote control in the power on state;
 - (2) The intelligent battery is kept turned off and connected to the aircraft;
 - (3) Trigger the remote control "battery power on button", the indicator light flashes quickly for about 2 seconds, control the smart battery to turn on.
3. **Power:** The remote power switch is powered by a standard 9V battery, which can be installed in accordance with the positive and negative pole marks of the battery compartment.
4. **Remote antenna:** The remote antenna is a tie rod antenna, when using the remote control, pull out all the antennas.

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The device can be used in portable exposure condition without restriction.
