## II. Product components

### Three, accurate use and wear guidance

The main machine of spray bark stopper uses lithium battery as power supply, and is equipped with USB charging cable, which can be recharged. Remove the worry of changing the battery.

The remote control of the spray bark stopper is powered by the button battery and can stand for about 30 days.

### Indicator display mode:

1. When starting up, the green light flashes every 3 seconds, indicating that it is in automatic spray mode;
2. When starting up, the red light flashes every 3 seconds, indicating that it is in remote control mode;
3. If the traffic light blinks continuously, it indicates that the power is insufficient and needs to be charged.

Startup mode:

1. After holding down the on key, the red light flashes once to start the remote control mode. (Red light flashing every 3 seconds, normal working condition)
2. Press the on key again and the green light flashes once, then switch to automatic spray mode (the green light flashes once every 3 seconds, normal working state)

Off mode:

After holding down the on key for 3 seconds, the traffic light blinks at the same time, and the host mode is normally closed.

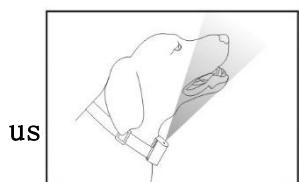

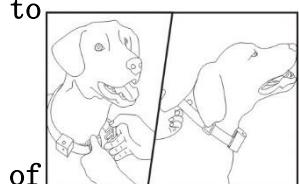

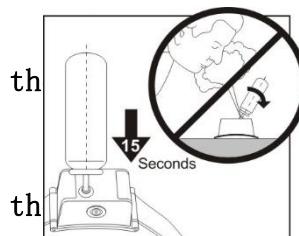

Remote control mode:

Hold down the remote control spray button, the main machine will trigger the spray, hold down the remote control switch, the main machine will stop the remote control function.

Charging mode:

When charging, please turn off the machine and connect the mobile phone charger and desktop computer with UBS data cable.

Replenishment of air and body fluid volume:

First be shut down before replenishing

Gas, and then start the main engine.

Aeration point: before aeration, put air into

Drain (with a small screwdriver to the

pressure twice)

The filling tank is fixed vertically with the

the bark stopper

Press into the air vent and hold for 10 seconds

Put a bark stopper on your dog:

Adjust the collar strap according to the size

Excision of the remainder.

Proper wear is the prerequisite for effective

bark stopper on

Attach it to the dog's neck and point the spray nozzle vertically at the pet's nose,

The size of the collar allows a hand to fit between the collar and the dog's neck

Fingers as the standard. This will accurately identify the frequency of barking.

Installation is very important, too loose bark stop will cause the action is not

Coordinate and affect the normal operation of products.

For dogs with long hair, trim the coat on the

#### **spray path**

Send, ensure the fog can spray to the effective range.

#### **Iv. Product functions and effects**

1. Low power consumption, lithium battery can be recharged repeatedly, without replacing the battery, reduce environmental pollution.

**FCC Warning Statement:**

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**FCC Radiation Exposure Statement**

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
