Bass Boost on/off	Long press the "B" button, display show "Eq0" means normal, "Eq1" means bass boost
Switch music source	Long press the "Previous" button to switch from Bluetooth mode or U disk/micro SD card mode music, when switch to Bluetooth mode you have to press "MFB" to start the music
Switch light mode	Press the "Light switch" button
Activate phone voice control	After paired with phone, long press the "Next" button

Transmit music to car stereo:

Bluetooth mode: Step (1)~ (5);
U disk/micro SD card mode: Step (1), (3), (4), (6)

- (1). Plug the transmitter into your car charger port, the Bluetooth icon on display flashes means it is in pairing mode.

- (2). Turn on the Bluetooth function of your phone, search for Bluetooth devices and connect "T77".

If pairing is successful, the Bluetooth icon on display will stop flash.

Auto-connect: The product will auto-connect the last connected phone when turned on next time. (Please turn on the Bluetooth function of your phone before turn on the product.)

- (3). Adjust the car FM radio to a blank frequency from 87.5MHz to 108.0MHz, for example: 88.1.

- (4). Adjust the product into the same frequency with the car FM radio. (Long press the "MFB" until the frequency flashes, and then roll the "Scroll switch" to add/reduce frequency.)

- (5). Open the music player/navigation of your phone, now it can transmit the phone calls, music or navigation to car stereo system.

Tip: Turn the phone volume and transmitter volume into max level first, then tune your car volume to appropriate level, to get the best sound quality.

- (6). You can also insert the U disk/micro SD card into the product, it will automatically detect and play the MP3/WMA/FLAC/WAV/APE format music.

Tips:

1. For the best audio quality, please turn the volume of your phone and product into the max level, and then tune your car volume to appropriate level.
2. The signal of any FM transmitter sometimes may be interfered by the surrounded radio or the similar frequency signal thus cause noise, this is normal.
3. If the noise is too loud, please try another blank FM station.
4. To prevent your car battery from being drained, please unplug the product after you turn off the car.

Charging:

Plug your charging cable in to the QC3.0/PD port, it will detect your device then output the max voltage and current that matches.

18W QC3.0 output 5V 3A/9V 2A/12V 1.5A max.
30W PD output 5V 3A/9V 3A/12V 2.5A max.

Note: When QC3.0 and PD ports are used simultaneously, the voltage output can only be 5V, and power output 20W max.

FCC STATEMENT:

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Warning Statements:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment shall be installed and operated with minimum distance 20cm between the radiator & body.

Correct Disposal Of This Product

(Waste Electrical & Electronic Equipment)

This making shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household user should contact either the retailer where they purchased this product or their local government office for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
