| <p><b>EUT Housing and<br/>Board View 1</b></p>      |  A photograph showing the internal components of an EUT housing. The housing is open, revealing a green printed circuit board (PCB) with various electronic components. A black USB cable is connected to the board. A ruler is placed horizontally below the housing for scale, showing measurements in centimeters and millimeters. The background is a blue textured surface.                                            |
| <p><b>Solder<br/>Board-Component<br/>View 1</b></p> |  A close-up photograph of a solder board component. The component consists of a green PCB with a white rectangular area, connected to a circular component with a black center and a white outer ring. Two thin wires are visible connecting the components. A ruler is placed horizontally below the component for scale, showing measurements in centimeters and millimeters. The background is a blue textured surface. |

|                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <p><b>Solder<br/>Board-Component<br/>View 2</b></p> |  <p>A photograph showing a green printed circuit board (PCB) with various electronic components, including a microcontroller and several resistors. Two thin, light-colored wires are soldered to the board and extend to a circular, dark-colored component. The assembly is placed on a blue textured surface. A metal ruler is positioned vertically on the left and horizontally at the bottom for scale. The vertical ruler shows markings from 1 to 13 mm, and the horizontal ruler shows markings from 1 to 14 cm.</p> |
| <p><b>Antenna View</b></p>                          |  <p>A photograph showing the same assembly as in the previous view, but with a focus on the circular component, which is a coil antenna. A red rectangular box highlights the antenna, and a red line points from a label "Coil Antenna" to it. The PCB and wires are visible in the background. A metal ruler is positioned vertically on the left and horizontally at the bottom for scale. The vertical ruler shows markings from 1 to 13 mm, and the horizontal ruler shows markings from 1 to 15 cm.</p>                |
