

OJD-126 4-in-1 Magnetic Wireless Charger

User Manual

CE FCC RoHS
Made in China

Product Introduction

Thank you for purchasing this product! This product is a four-in-one magnetic wireless charger, integrating phone wireless charging, watch wireless charging, earbuds wireless charging, and night light function. With an overall separation design, the dismantled part for phone wireless charging is a mobile power bank, supporting PD20W output. The dismantled part for the watch is a watch module, supporting Samsung & Apple watch wireless charging. It is suitable for a variety of scenarios and can provide you with a convenient, fast, and exquisite life experience.

Product Appearance

Product Parameters

Product Name: 4-in-1 Magnetic Wireless Charger
Product Model: OJD-126
Wired Input: 9V 2A
Phone Output: 5W/7.5W/10/15W
Earbuds Output: 3W (MAX)
Watch Output: 3W (MAX)
Product Size: 71*121*120mm
Product Weight: 235g

Usage Method

1.Regular use

- (1)Combine the charging treasure and watch module to the charging base respectively.
- (2)Plug in the Type-C cable and connect with the power supply (adapter).
- (3)Place the compatible phone, Qi-enable earphone,Apple watch in the center of the charging area and start charging.
- (4)The watch module supports Apple watch charging on one side and Samsung watch charging on the other side, users can choose according to their needs, and it doesn't support the use of both sides at the same time for the time being.

2.Separate use

- (1)Remove the mobile power to use it separately.
- (2)Place the cell phone supporting wireless charging in the center of the charging area to which it belongs and start charging.
- (3)When the power of the mobile power supply runs out, you can plug it back into the base to replenish the power, or use the adapter power supply to plug it into the C port at the bottom of the mobile power supply to replenish the power.

Attention

1. When you use this product for the first time, please read the user's manual in detail and use it according to the user's manual for correct operation.
- 2.Please use an adapter that meets local safety standards to avoid unstable charging.
3. Please do not place metal sundries or magnetic cards on the product to prevent product damage or abnormal charging.
4. Please do not use the product in high temperature, humid or corrosive environment to avoid damage to the circuit.

5. Please do not disassemble this product by yourself, when you need maintenance or repair, please hand it over to after-sales or professional maintenance personnel.

FAQ

- Q1. The phone does not charge.
A: Poor contact of mobile power. Please try to plug and unplug the mobile power again.
- Q2. Charging fever.
A: It is normal for the receiving coil or transmitter to generate heat during wireless charging.
- Q3. Slow charging.
A: The wireless charging, current allowed by the mobile phone itself or the external receiving coil is different, or the standby power consumption of the mobile phone is large when charging, it is recommended to reduce the standby program of the mobile phone.
- Q4. Other questions.
A: Please contact after-sales customer service directly.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.
To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
