

User Guide

Before using this product, please read the user manual carefully. This particularly applies to the safety instructions. Failure to observe this user manual may result in severe injury or damage to the product. Store the user manual for future use.

1. Check the packed contents

If you are not cautious when opening the packaging with a sharp knife or other pointed objects, you may quickly damage the torch.

- Be very careful when opening.
- a. Take the product out of the packaging.
- b. Check to make sure that the product is completed.

2. Performance parameter

Input voltage : 5~12V (max: 14V)

Input current : $\geq 2\text{A}$

Output: 10W (max: 15W)

Operating temperature range: $-20^{\circ}\text{C} \sim +60^{\circ}\text{C}$

3. Usage:

Connect the 5-12 volt power supply, put the battery in the middle position of the coil, and the wireless charging module starts to work. When the battery is removed, the wireless charging is in a dormant state.

4. Cleaning

Risk of damage!

Improper handling of the product may damage it.

- Do not use any aggressive cleaners, brushes with metal or nylon bristles or sharp or metallic cleaning utensils such as knives, hard scrapers and the like. They could damage the surfaces.
- Never submerge the product in water or other liquids.
- Make sure that water and other liquids do not end up in the housing.

5. Storage

Always store the product in a dry area.

The battery in this product is not exchangeable, please replace the new device in time after the service life reaches.

Keep away from all flame during storage.

Attention of host manufacturer

The host manufacturer must make a C2PC to use this limited module and print "Contains FCC ID: 2A9OA-C0N-ZTH-WC" on the host label (the module is not shielded, so it needs to retest the RSE with the host), and the host needs to meet FCC Part 15, Subpart B.

FCC ID warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20 cm (7.8 inches) between the antenna and your body when the function for Wireless charging is active. Users must follow the specific operating instructions for satisfying RF exposure compliance
