Solder Board-Component View 3	 A photograph showing the underside of a small electronic component (likely a module) mounted on a white printed circuit board (PCB). The component is positioned on a blue textured surface. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale. The ruler shows dimensions of approximately 100mm by 100mm. The component has a circular feature on the left and various electronic components and solder joints on the right.
Solder Board-Component View 4	 A photograph showing the top side of the same electronic component. The component is mounted on a white PCB. It features a small label with text, a circular feature, and a series of pins or connectors on the right side. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale, showing dimensions of approximately 100mm by 100mm. The component is set against a blue textured background.

Solder Board-Component View 5	 A photograph showing a small electronic component, likely a module, placed on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: one in millimeters (0 to 100) and one in centimeters (0 to 10). The component is oriented vertically, with its longer side parallel to the 0-100 mm scale. The component itself is white with various electronic components, including a large black circular component on the right side and a smaller black component on the left side. The component is soldered to a board.
Antenna View	 A photograph showing the same electronic component from a different perspective, focusing on the antenna area. The component is placed on a blue textured surface. A red box highlights a specific area on the component, labeled "WIFI /BT Antenna". The component is oriented horizontally, with its longer side parallel to the bottom edge of the frame. The component is white with various electronic components, including a large black circular component on the left side and a smaller black component on the right side. The component is soldered to a board.
