

3 in 1 wireless charging powerbank M2108Q

1. ON/OFF button
2. Type-C2 input
3. Type-C1 input/output
4. USB-A output
5. Digital Indicator
6. Wireless charge area for phone
7. Wireless charge area for iwatch magnetically
8. Wireless charge area for TWS

Specifications

Capacity: 10000mAh/38.5Wh
Type-C1 Input: 5V/2.6A, 9V/2.2A, 12V/1.5A 18W(Max)
Type-C1 Output: 5V/3A, 9V/2.2A, 12V/1.67A 20W(Max)
Type-C2 Input: 5V/2A, 9V/2.2A, 12V/1.5A 18W(Max)
USB-A Output: 5V/3A, 9V/2.2A, 12V/1.67A, 5V/4.5A, 4.5V/5A 22.5W(Max)
Output for phone: 5W/7.5W/10W/15W (Max)
Output for earbuds: 5W
Output for watch: 2W
Wireless Charging Efficiency: ≥75%-80%
Compatibility: Qi charging standard devices only

Protection Features:

Over-current, Over-charging, Short-circuit, Over-heat Protection

Size:

138*72*22mm / 5.4*2.8*0.86 inch

Weight:

300g / 10.6oz

Package Content

10000mAh Wireless Portable Charger * 1
Metal Sheet Ring * 1
USB-C Cable * 1
User Manual * 1

How to Use

- Press once/twice to activate/deactivate digital display, wireless, USB-C and USB-A output;
- Automatically start/stop(in 40s) charging once a phone is connected/disconnected;
- To recharge the 3 in 1 wireless charging powerbank, please use the USB-C cable which comes with the charger, a wall charger adapter is required (not included).

Caution

1. Keep the power bank away from liquids or any heat source;
2. Please do not dismantle the product;
3. Fully charge the battery pack at least once in every four months;
4. Dispose of battery under local legal environmental terms;

FAQ

Q: What's the output efficiency of this portable charger.

A: The output efficiency of this unit is over 80%, approximately 20% of the battery capacity is unable to be used because of power consumption of circuit heat, conversions from the battery, the charging cable, etc. Actual charging efficiency may differ depending on your charging behavior.

Q: Is it compatible with iPhone 15/14/13/12/... , Samsung/Moto/LG/Google smartphone?

A:

1. For iPhone users, please know that magnetic wireless charging is supported for iPhones that released since iPhone 12.
2. For earlier iPhones, a USB-C or USB-A to Lightning cable is required (Does not come with this product).
3. For Android smartphones, if your device is wireless charging compatible, please make sure your device is placed exactly on the wireless charging section.
4. For Android smartphones without wireless charging feature, a USB-C or USB-A cable is required.

Q: Can I take it with me for international travel?

A: Yes, it can be used internationally. Just be sure that use a compatible adapter converter with the voltage of the country you're travelling to.

Q: Can it be taken on board airplanes?

A: Yes, all external batteries with capacity under 27027mAh/100watt hours can legally and safely be taken on board airplanes. For your reference, the capacity of this portable charger is 10000mAh / 38.5 watt hours.

Q: Does this support Qc/PD 3.0?

A: Yes, Power Delivery 3.0 and QC 3.0 are supported.

Model: M2108Q

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
