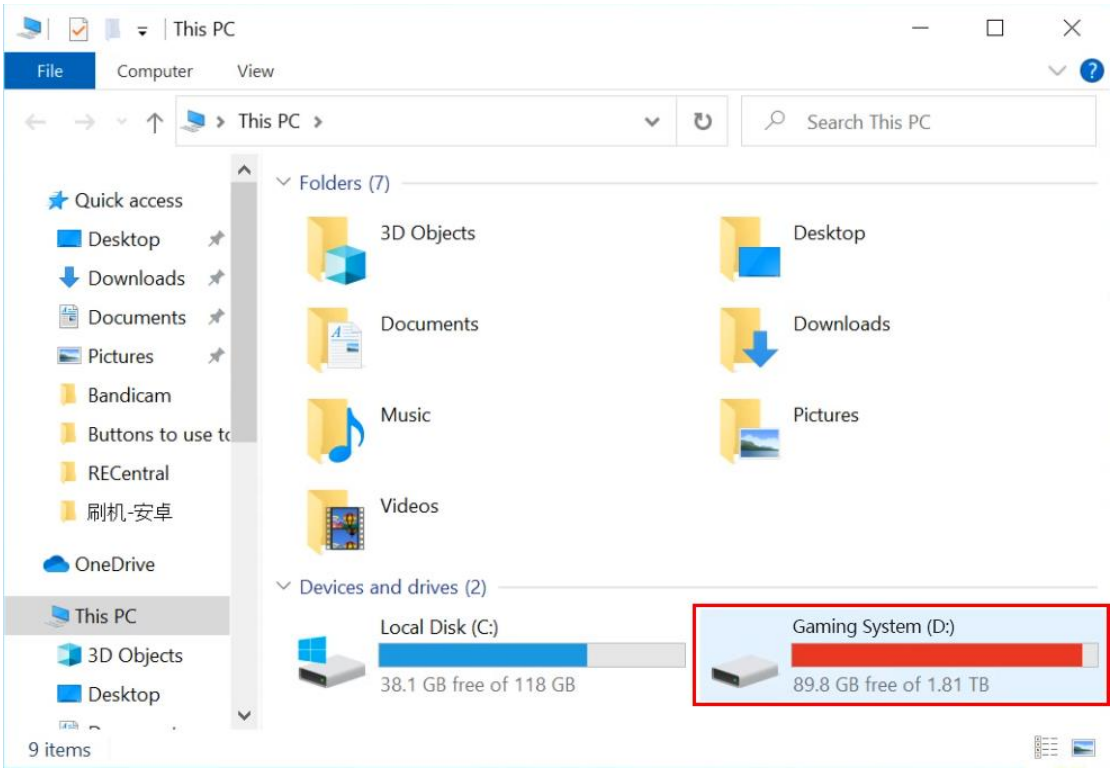
4. Press the power button to start the system.

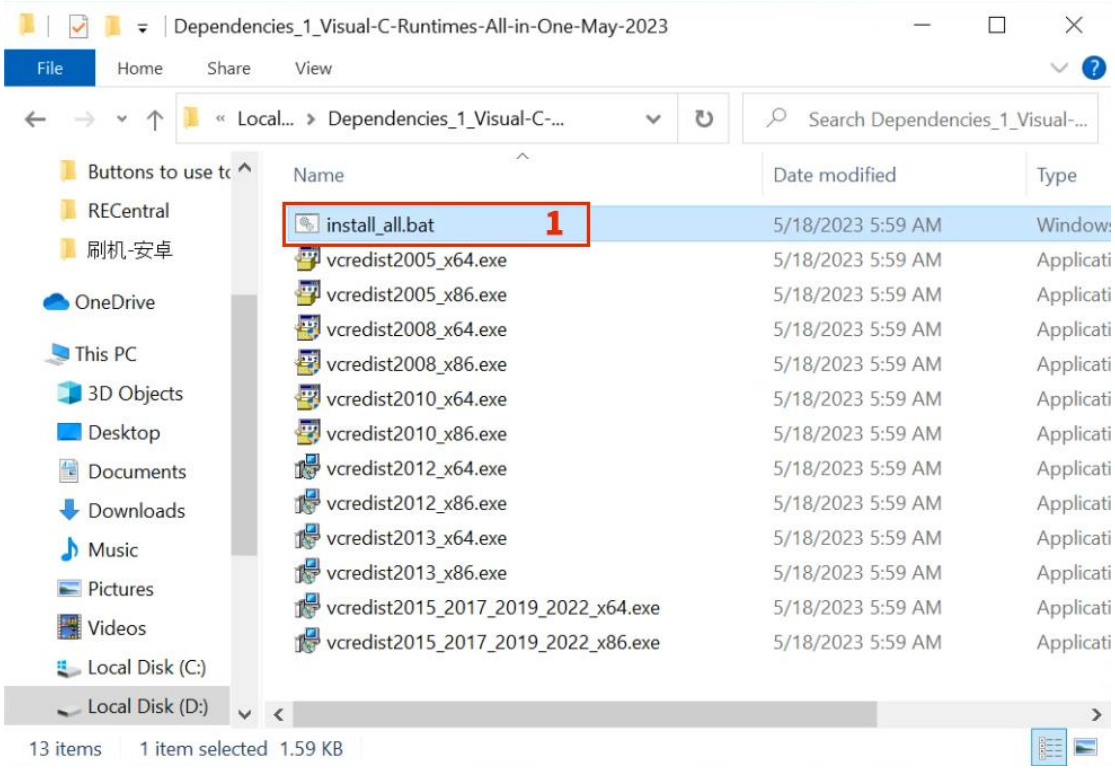
How to enter the Retrobat game system?

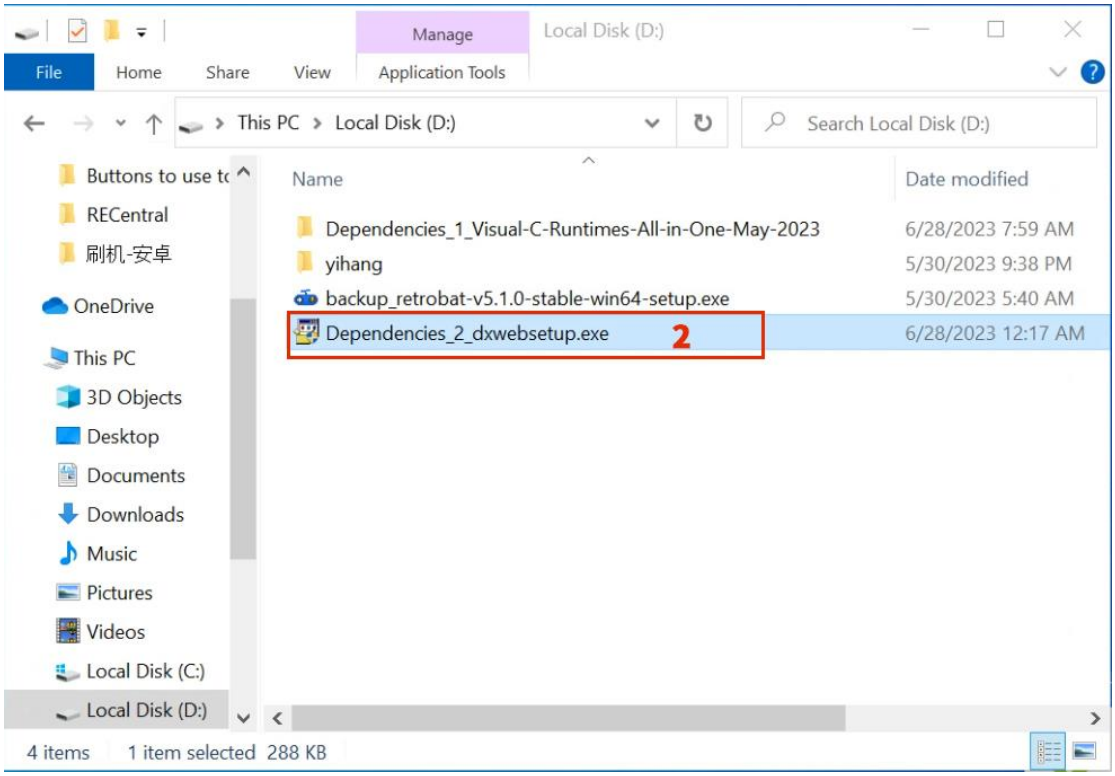
A 500GB HDD hard disk is pre-installed for you when the product leaves the factory. Please do not delete the files inside. Deleting or moving files will cause the game system to malfunction.

When you start your computer for the first time and complete the system configuration, the game disk will appear in Disk Management.



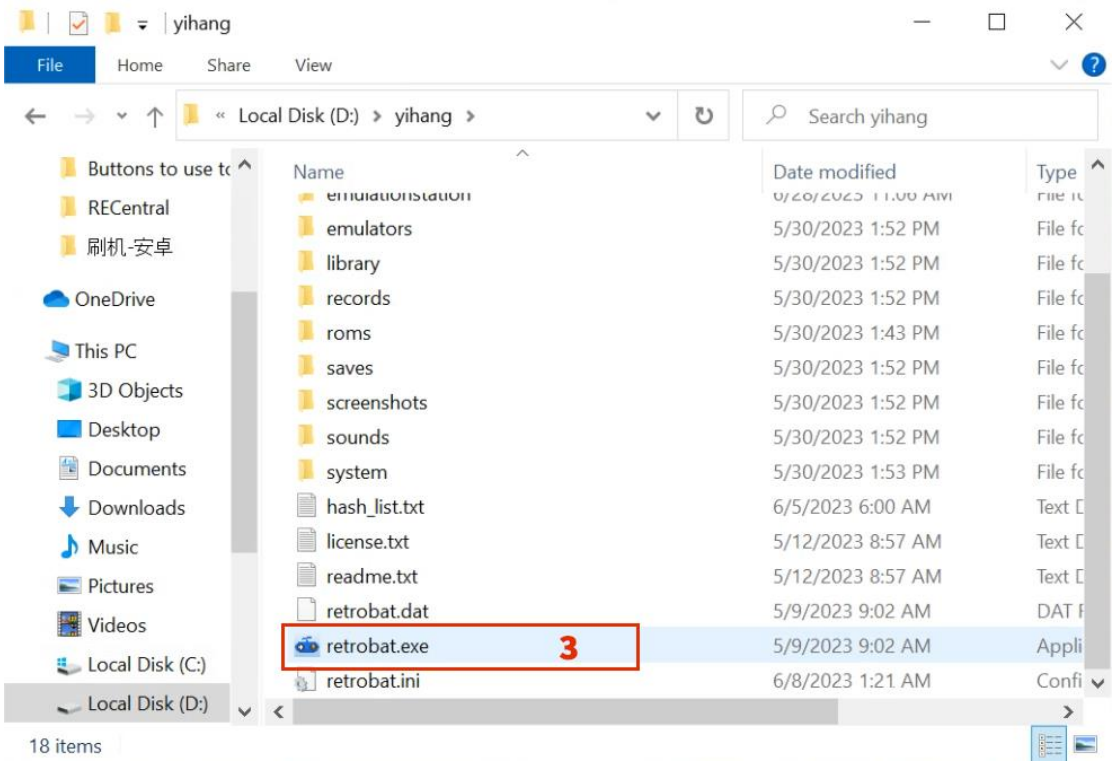
Step1： Install the program that the game system depends on, double-click the program and follow the steps to install it.





Step2： Enter the game disk, find the Retrobat.exe software application in the directory, double-click to enter the game system, or you can also send the shortcut to the desktop.

The game system will be displayed in full screen, you can still switch back to the Windows system through the computer system hotkey or the game system menu.



Tips: In some cases, the computer system may not be able to run the Retrobat Game System due to the lack of programs that the game system depends on. When you can't run the game system, you will be prompted about missing plugins. Just follow the instructions and follow the prompts to install plugin XX. (the probability of happening is very small)

How to use the Retrobat Game System？

Common hotkey settings

Left/right cross keys and joystick	Switch emulator platform
B key (right side function key)	Return or cancel
A key (lower function key)	Enter or confirm
START Key	Set up
SELECT Key	Soft restart or soft shutdown setting
L2/R2	Game menu page flip
Select + Start(press twice)	Quite Game （ Quite game's hotkeys are available throughout the system, but most of the other hotkeys only work when using the retroarch core. ）
Select + A	Enter Retroarch
Select + B	Pause
Select + X	Save date
Select + Y	Load date
Select + R2	Mute

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit
different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC’s RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
