Connecting BT on Madeline

1 / Enable BT on your device for pairing.

2 / BT automatically turns on when you turn on the power on the Madeline.

3 / To ensure BT is on, you can press and hold on () to put Madeline in pairing mode for your device. A blue light indicator at the back of the mirror will be blinking with a sound, indicating that it is ready to connect and pair with your device (e.g. mobile phone, tablet).

4 / Once successfully paired, you can now make voice calls and listen to music!

Tips: Make sure Madeline and your device are situated close enough. If your BT devices are not connecting, it could be due to devices being out of range or they are not in pairing mode. If BT connection problems still persist, try resetting your devices (including Madeline), or have your devices "forget" the connection and restart again.

Note: If you are playing music as the call comes in, the song will pause so that you can answer the call. The song resumes once you end the call, as long as the BT is still connected. When turning off the BT, there will be a sound alert indicating that it is disconnecting the BT, thus disconnecting music and calls from your device.

Playing music & Answering calls

Short press

1. Answer and end calls
2. Play and pause music

Long press

To increase volume
To turn ON or OFF BT

Short press

To play previous song
To enable microphone

Long press

To lower the volume

Short press

To play next song

Warnings

Keep this product away from young children and pets.

This product contains glass and may shatter if dropped. Handle with care.

Do not place the mirror in direct sunlight. Reflection of direct sunlight by the mirror could cause a fire.

This mirror is not waterproof. To protect against electrical hazards, keep away from water.

Use this mirror for its intended purpose.

This product should be recycled or disposed of in accordance with local guidelines.

- 2 / Mirror
- 3 / 15 LED Bulbs
- 4 / Control Panel
- 5 / BT Speakers
- 6 / Wall Mount Holes
- 7 / Stand
- 8 / Mic Speaker

fancii

3 light setting options

Neutral White (6000k)

True neutral white (no red or blue hues), is recommended for getting photo-ready.

Soft White (3500k)

This warmer hue (free of blue light) is perfect for creating a makeup look for an evening occasion like a date night or for night-time skincare routines to help ease you into sleep.

Natural Daylight (5000k)

All-round ideal light for daytime makeup as it simulates natural daylight.

POINT 04 Ensure you are facing the back of the mirror to be able to access plugging in the mirror with the provided cord to a reliable power source.

Let's begin

POINT 03

Madeline can also be mounted on the wall, simply by utilizing the two wall mount holes on the back of the mirror.

POINT 04

Display Madeline as a vanity mirror on a tabletop by pulling out the stand located at the back of the mirror, and adjust the angle of the mirror to your preferred position.

POINT 05

Note: As with all materials vary, screws for fixing to the wall are not included. For advice on suitable screw systems, contact your local specialized dealer.

POINT 12

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator& your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
