

User Operating Guide

Please read this guide thoroughly before operating the training dog device

Model: PD01

Important safety information

⚠ WARNING (Not for aggressive dogs)

Do not use this product if your dog is aggressive, or if your dog is prone to aggressive behavior.

Aggressive dogs can cause severe injury and even death to their owner and others.

If you are unsure whether this product is appropriate for your dog, please consult your veterinarian or certified trainer.

⚠ CAUTION

Avoid leaving the collar on the dog for more than 8 hours per day, it may cause SKIN IRRITATION.

If possible, REPOSITION the collar on the pet's neck every 1 to 2 hours, it will prevent the skin from damage.

When using the shock mode, start from the LOW LEVEL OF SHOCK and look at your dog's reaction. If your pet becomes uncomfortable, STOP USING the collar immediately.

The collar is waterproof, the remote transmitter is NOT waterproof.

Make sure the collar is NOT TOO TIGHT, two fingers must fit between the collar belt and your dog's neck.

EXAMINE the neck area of your dog DAILY to ensure the absence of rash and redness.

Do not plug or unplug USB port hard while charging.

These cautions will ensure safety and comfort of your pet. Millions of dogs are comfortable while they wear stainless steel contacts. Some dogs are sensitive to contact pressure. You may find after some time that your dog is very tolerant of the collar. If so, you may relax some of these precautions. It is important to continue daily checks of the contact area. If redness or sores are found, discontinue use until the skin has fully healed.

Overview

Remote Transmitter

Collar Receiver

Turn On and Off Receiver and Remote

Receiver Collar

Turn On: Press the receiver power button, a short beep come out, the receiver turn on

Turn Off: Press the receiver power button again, 2 short beep come out, the receiver turn off

Remote Control

Push up the on/off button is on, and push down the on/off button is off.

Low Battery Warning and Charging

• Low Battery Warning

Collar Receiver: There are 4 white lights on the receiver, if only 1 light is left on, it needs to be charged.

NOTE: 4 white lights indicate 100% power, 3 white lights mean 80% power remaining, 2 white lights mean 50% power remaining, and 1 white light means 30% power remaining

Remote: It is the bottom of the LCD screen, when the battery icon has only 1 bar that means it needs to charge.

• Charging

Collar Receiver:

When charging, the white light will change from 1-4 lights. It will stop at 4 lights when it is fully charged.

Remote:

When charging, the battery icon will change from 1-4 bars. It will stop at 4 bars when it is fully charged.

Sleep Mode

Collar Receiver:

After 5 minutes of no operation with the receiver, it enters sleep mode and maintains extremely low power consumption. Press any button on remote can wake it up

Remote:

After 30 seconds of no operation with the remote, the screen backlight will turn off, and after 1 min, it enters sleep mode and maintains extremely low power consumption. Pressing any button on the remote can wake it up

Channel

Channel Button: There 3 channels modes that can be switched, channel 1 channel 2, and channel 1+2

Channel 1: Only show this icon (1) on the remote screen. If you pair the remote and receiver on channel 1, only on channel 1 that the function can work.

Channel 2: Only show this icon (2) on the remote screen. If you pair the remote and receiver on channel 2, only on channel 2 that the function can work.

Channel 1+2: Showing this icon (1+2) on the remote screen, if you pair on this channel, the receiver can work on 3 channels. If pairing multiple receivers on this channel would deliver the same command to receivers at the same time.

Replace The Probes

How to Pair

1. Hold the power button of the collar receiver for 3 seconds into pairing status. You will hear 1st beep from the collar receiver and the led light will flash 10 seconds.

2. Press the Beep button

3. You will hear 2nd "beep" from the collar receiver, which means the pairing is successful.

NOTE: If need to pair the second collar receiver, follow the same steps but needs to press the channel button and change to a different channel

Function Mode

How to use the test light

The test light is use to the test the shock mode work or not.

How do the test light work?

How to Install the Belt

Step 4 is the most important step to keep the collar not fall off.

Collar Fitting

Product Specification

Collar Length	27 inch
Adjust Collar Range	8-25 inch
Control Range	1000 FT
Receiver Waterproof Rating	IP67 waterproof
Remote Waterproof Rating	Non-waterproof
Working Time	Remote: 60 days Collar receiver: 15 days
Charging Time	It takes about 2-3 hours to fully charge

Frequently Asked Questions

- Why the receiver does not respond to the remote?
Please make the remote on the right channel. If you pair channel 1, and then you switch to channel 2, the receiver will not respond to the remote.
- Once my pet is trained and has been obeying my commands, will he have to continue to wear the Receiver Collar?
Probably not. You may need to reinforce training with the Receiver Collar from time to time.
- Is the Vibration/Shock safe for my pet?
While the Vibration/Shock is unpleasant, it is harmless to your pet. Electronic training devices require interaction and training from the owner to achieve desired results.
- Why is the collar can't be used normally when I got it or after a few days?
You have to charge the collar and remote for 2-3 hours before using them. Sometimes the reason is the battery power is off.

Training Tips

- Make training sessions short and positive (between 10-15 minutes long for each session) This will enable the dog to keep its attention focused on the trainer.
- Train one dog at a time.
- During the first initial training sessions, keep the dog in a familiar outdoor environment. Training in new locations may cause the dog to become distracted, causing you to reinforce commands with the Collar Receiver more than necessary.
- Use a long leash fastened to a non-metallic collar to help the dog's learning. Ensure the additional collar and leash does not interfere with the Contact Points on the Collar Receiver. Do not use the remote training collar without a long leash until your dogs are fully trained.
- More success will occur by teaching the dog a command first before trying to reinforce the command with Remote Transmitter.
- For basic obedience training, vibration is more useful.
- Issue one obedience command at a time, this will reduce confusion and allow the dog to remain focused. Do not use the training device for commands that the dog has not learned.
- During training, look for all the positive changes in the dog's behavior and remember to reinforce them promptly with ample praise and reward.
- Avoid over-correcting your dog. Use as little remote correction as possible during the training process.
