

Operating instructions of TEL-10303 remote control

Operation:

- A: Bluetooth name: Teladoc TV Pro Remote
- B: Pairing key: press the left and right keys simultaneously for three seconds to enter pairing mode;
- C: Low power indication: When the power supply voltage of the remote control is less than 2.5V, D1, D2 and D5 yellow lights are on at the same time;
- D: The remote control has an API that reports battery power and Bluetooth connection strength
- E: When the battery is replaced and the host is disconnected, the remote control will remember the previously paired device. After the battery is replaced and the host is powered on again, the remote control should actively establish a connection with the device (press the key)
- F: Sleep: If the remote control does not act within 10 minutes, it will enter the deep sleep mode. When the button is pressed, the remote control will establish a connection with the host computer. The pressed button must be saved first and then sent data. The time to connect back should not exceed 2 seconds

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The devices has been evaluated to meet general RF exposure requirement , the device can be used in portable exposure condition without restriction
