 - connection to APP, then you can use APP to remote control Efee.
- Note: if Efee is in state of no vibration and no operation, he will automatically turn off 3 minutes later.

Maintenance

- Always clean Efee's soft silica thoroughly before and after each use. We recommend that you use the respected antibacterial soap to clean the soft silica, then rinse with clean hot water and pat dry with a lint-free cloth or towel.
- we recommend that a premium water-based lubricant is the surest option to increase comfort.
- Never use cleaners containing alcohol, petrol or acetone to clean Efee
- Never use massage oils or hand cream as lubricants for the intimate areas.
- Please store Efee in full power after each use.
- Avoid leaving Efee in direct sunlight and never expose it to extreme heat.
- Do not use on swollen or damaged skin.
- Keep Efee out of the reach of children.
- If your EFEELINK appears to function abnormally, turn off and enter into "www.efeflink.com" and find the "custom service" to check out the solution of the problems. If you have any questions about EFEELINK, please E-mail us: [service @efeflink.com](mailto:service@efeflink.com)

Important Statements:

This device complies with Part 15 of the FCC Rules. Its operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
