Board View 1****EUT Housing and
Board View 2**

Solder Board-Component View 1	 A photograph of a small, square electronic component with a central circular hole, mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width spanning approximately 10 to 20 mm. The component has several small, rectangular solder pads on its surface.
Solder Board-Component View 2	 A photograph of the same electronic component from a different angle, showing the underside. The component is mounted on a blue textured surface. The ruler is visible, showing the component's width is approximately 10 to 20 mm. The underside of the component shows various solder pads and components, including a small yellow component near the center.

Solder Board-Component View 5	 A photograph of a small, rectangular printed circuit board (PCB) component, likely a Wi-Fi module, resting on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB features various electronic components, including a green integrated circuit (IC) in the center, several smaller components, and a gold-colored connector on the right side. The text "WIFI ANT" is visible on the top edge of the board.
Solder Board-Component View 6	 A photograph of the same PCB component from a different angle, showing the underside. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The underside of the PCB shows various electronic components, including a large black IC in the center, several smaller components, and a gold-colored connector on the right side. The text "WIFI ANT" is visible on the top edge of the board.
